# DASHBOARD

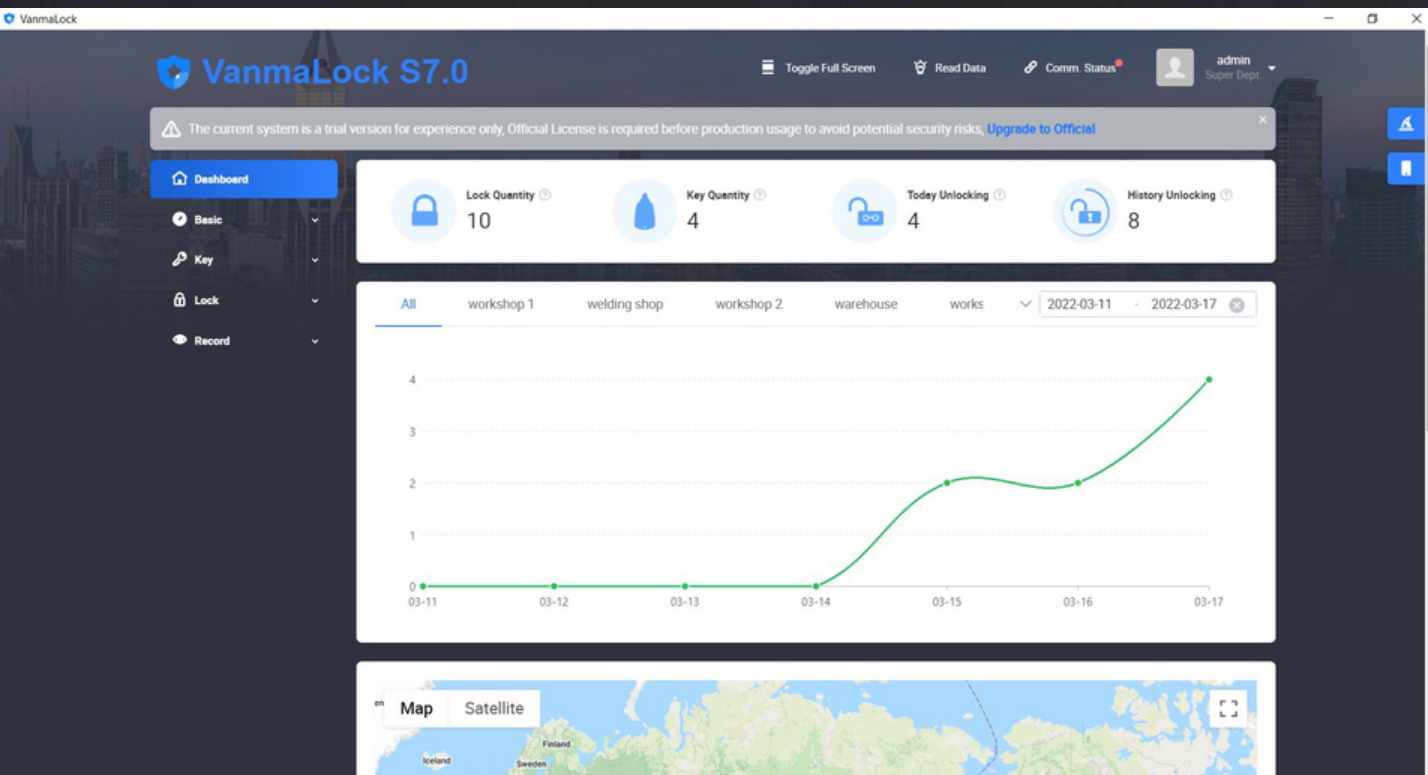

*Make Management Accessible*

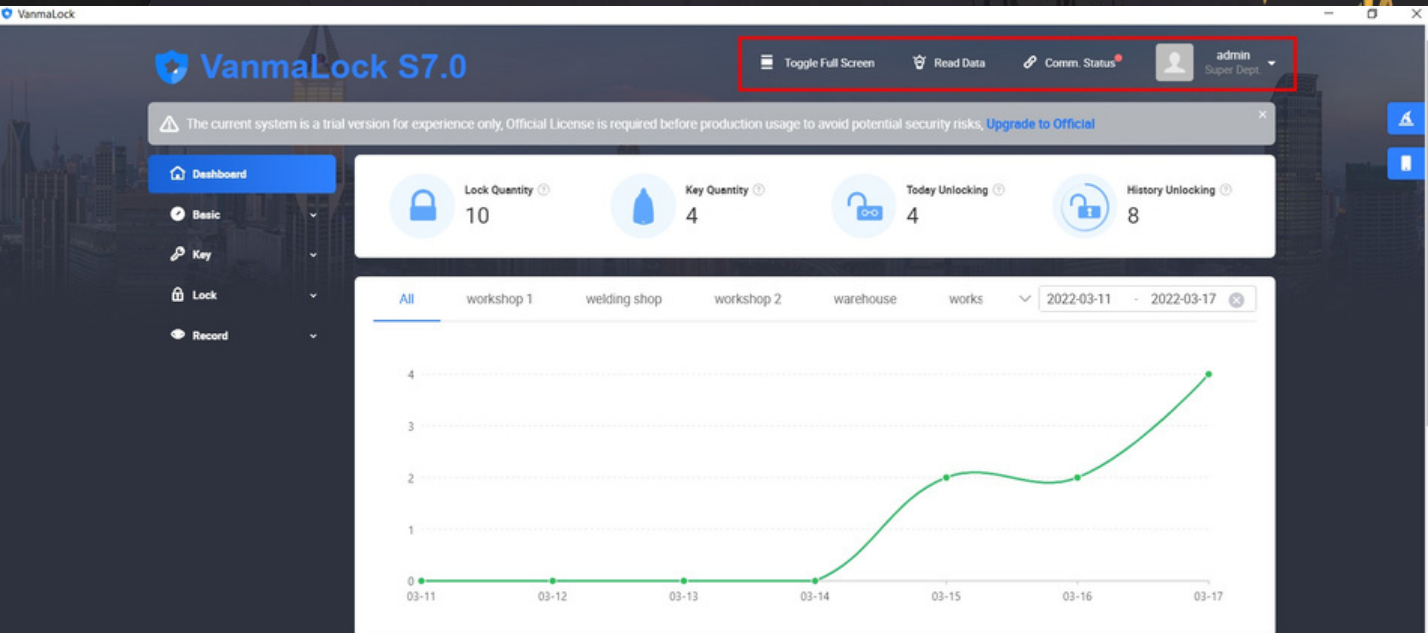

# Dashboard

From following picture you can see the dashboard of Vanmasoftware. From the dashboard page you can have a brief view of the locks, keys, and staffs' job.

Certainly, you also can make some system settings at this page. And now we can follow the pictures to learn more about the dashboard.

# Dashboard

At the above place, you will see some modules that writes: Toggle Full Screen, Read data, and Comm. (Communication) Status.

Toggle Full Screen is easy to understand that help user to get a better view of software.

Read data will be worked only when the Vanmakey is connected. You can read the data from key to the software easier.

And for the communication status please check the picture in the page.

# Dashboard

Comm. Status

## Comm. Status

Communication status of the system, including launching and registering status of communication program and Key.

Key

Connecting Status

registered

At communication status you can confirm if the Vanmakey is connected with the software in correct way. please check the picture in the page.

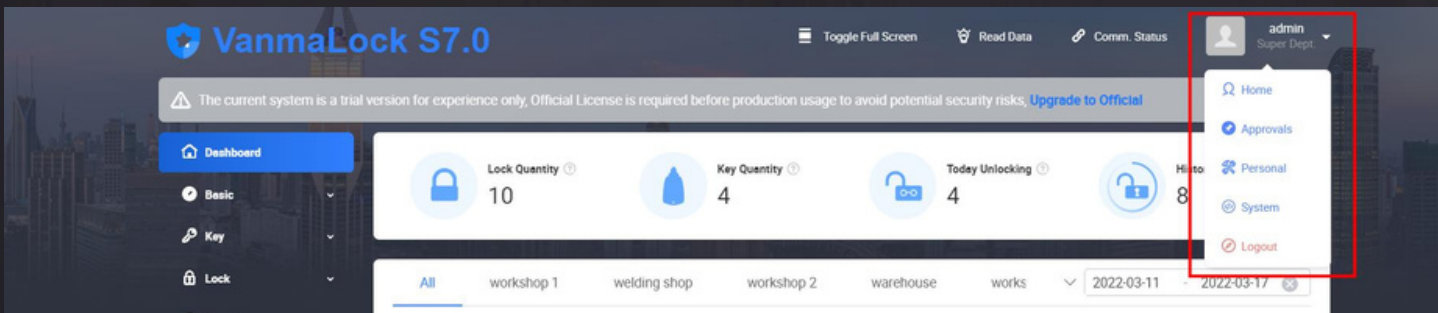

When the key is connected, the first green will be enabled, and only after you download the driver, the last two green will be enabled.

You can download the driver from following:

# Dashboard

Please notice that the driver download is **NECESSARY**.

You can make some system basic settings from here.  
And each button will redirect to a new page:

Above is the personal settings page. You can modify and make your account settings here. Password can be modified here as well.

# Dashboard

Following picture shows the system settings, it is a very important page.

Our official system is secured by a unique system code. And all the keys and locks registered in this software have this code inside. (if the system code is not same, the

key, the locks and the software cannot communicate each other)

Currently (in the picture) it is trial license, we strongly recommend you to upgrade after you get the software.

Another interest thing is “show customization”, you can design your own logo and display it on your software. Is it interesting? Click it and have an exploration.

# Dashboard

We continue to see the next part of dashboard.

From the following picture you can have a statistics view of your unlocking status. You can choose different department.

# Dashboard

You also could see the lock place on the map, if you set a position for the lock when you make setting.

In above map, the red icon shows the lock position and the blue icon with a “2” inside means there are 2 locks in that region, and if you want to learn more detail, you need to zoom in the map.

# Dashboard

Followings are the last 2 parts at dashboard page. From the left you could learn the latest unlocking record, while the right part shows the latest setting records

The screenshot displays two panels from a dashboard. The left panel, titled 'Latest Unlocking Records', lists seven entries with padlock icons and timestamps. The right panel, titled 'Latest Setting Records', lists three entries with timestamps and associated actions. A modal window is open over the right panel, showing three buttons: 'Take Out', 'Give Back', and 'Lost'.

| Latest Unlocking Records |             |
|--------------------------|-------------|
| Ivan locked Padlock 1    | 03-17 19:15 |
| Ivan unlocked Padlock 1  | 03-17 19:15 |
| Ivan locked Padlock 2    | 03-17 19:15 |
| Ivan unlocked Padlock 2  | 03-17 19:15 |
| Ivan locked Padlock 1    | 03-17 09:48 |
| Ivan unlocked Padlock 1  | 03-17 09:41 |
| Ivan unlocked Padlock 2  | 03-17 09:41 |

| Latest Setting Records             |             |
|------------------------------------|-------------|
| Inspector was given back           | 03-17 19:24 |
| Warehouse Specialist was taken out | 03-15 20:38 |
| Inspector was taken out            | 03-15 20:37 |

Modal Window:

- Take Out
- Give Back
- Lost

And if you click more, the page will redirect to:

- Record--Unlock
- Record--Key usage/Key loss

Now the dashboard introduction is done, let's move to next part.

# BASIC

*Make Management Accessible*

# Basic Settings

The basic setting is the most important part when you start to use VanmaLock Management Software.

# Basic Settings

**User settings** defines the staff to visit your software. You could create different account to login your software. And choose the department your new user account want to check.

The screenshot shows the VanmaLock S7.0 dashboard. The top navigation bar includes a logo, the title 'VanmaLock S7.0', and several utility buttons: 'Toggle Full Screen', 'Read Data', 'Comm. Status', and a user profile dropdown for 'admin Super Dept.'. The left sidebar contains a menu with 'Dashboard', 'Basic', 'Dept.', 'Worker', 'User' (highlighted), 'Role', 'Key', 'Lock', and 'Record'. The main content area displays the 'Filter Conditions' section with dropdowns for 'Dept.' and 'From', and a 'To' date selector. Below this is a table of users with columns for Name, Dept., Role, TEL, Update Time, and Operation. The table contains two records: 'inspector' in 'workshop 2' with role 'leader2', and 'boss' in 'workshop 1' with role 'leader'. At the bottom, there are buttons for '+ Add', 'Delete', 'Reset', and 'Export', along with a 'Total of 2 record(s)' and a 'Show rows: 10' dropdown.

| Name      | Dept.      | Role    | TEL      | Update Time | Operation |
|-----------|------------|---------|----------|-------------|-----------|
| inspector | workshop 2 | leader2 | 83782790 | 03-15 20:02 | Edit      |
| boss      | workshop 1 | leader  | 83782790 | 03-15 20:00 | Edit      |

The screenshot shows the 'User Edit' form. It contains several input fields: 'Name' (inspector), 'Dept.' (workshop 2), 'Role' (leader2), 'TEL' (83782790), 'E-Mail' (support@lockmanag), 'Validity Period' (Please select validity period), and 'Password' (Default password is 999). The 'Role' and 'Validity Period' fields are highlighted with red boxes. At the bottom, there are 'Confirm' and 'Cancel' buttons.

**User Edit**

Confirm Cancel

Role settings comes together with the user settings. Let's go to the next part.

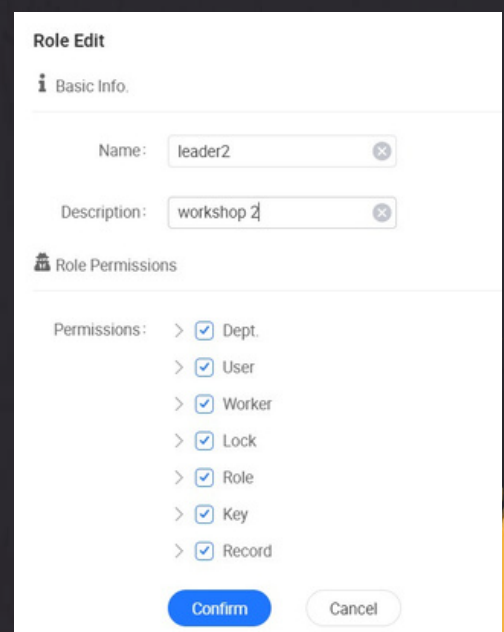

For securing your software and facilities, all accounts has a period of validity.

# Basic Settings

**Role settings** provide a better way to manage your software and the access to each accounts.

You could set different software operation permission for each role. And then assign this role to each new set users.
