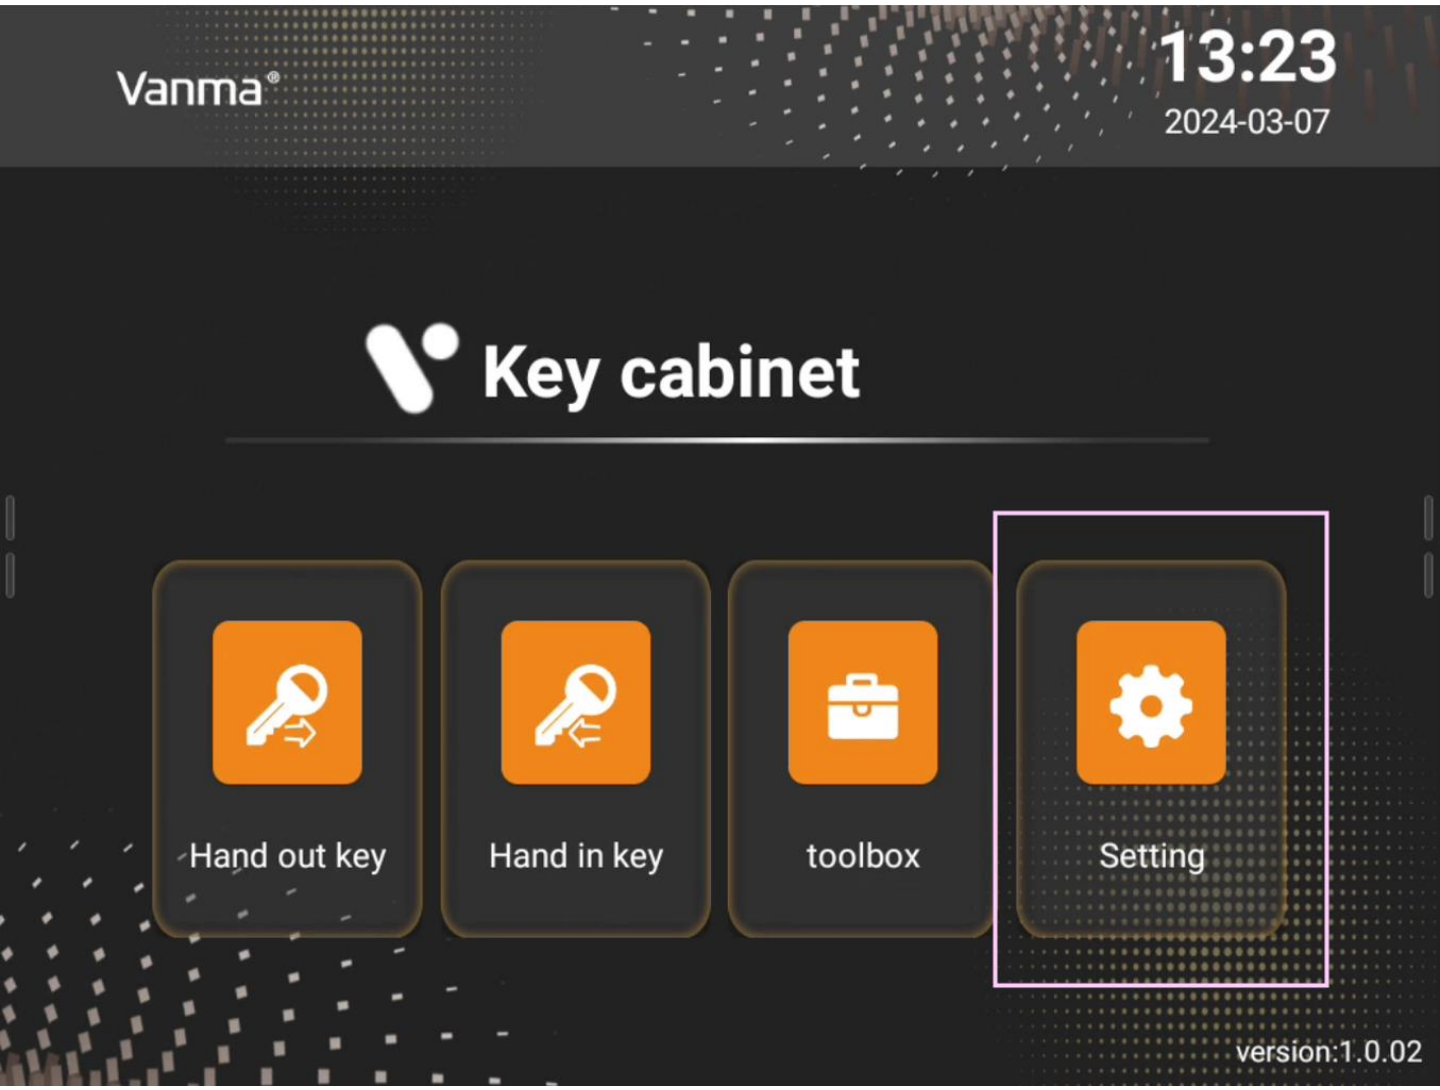
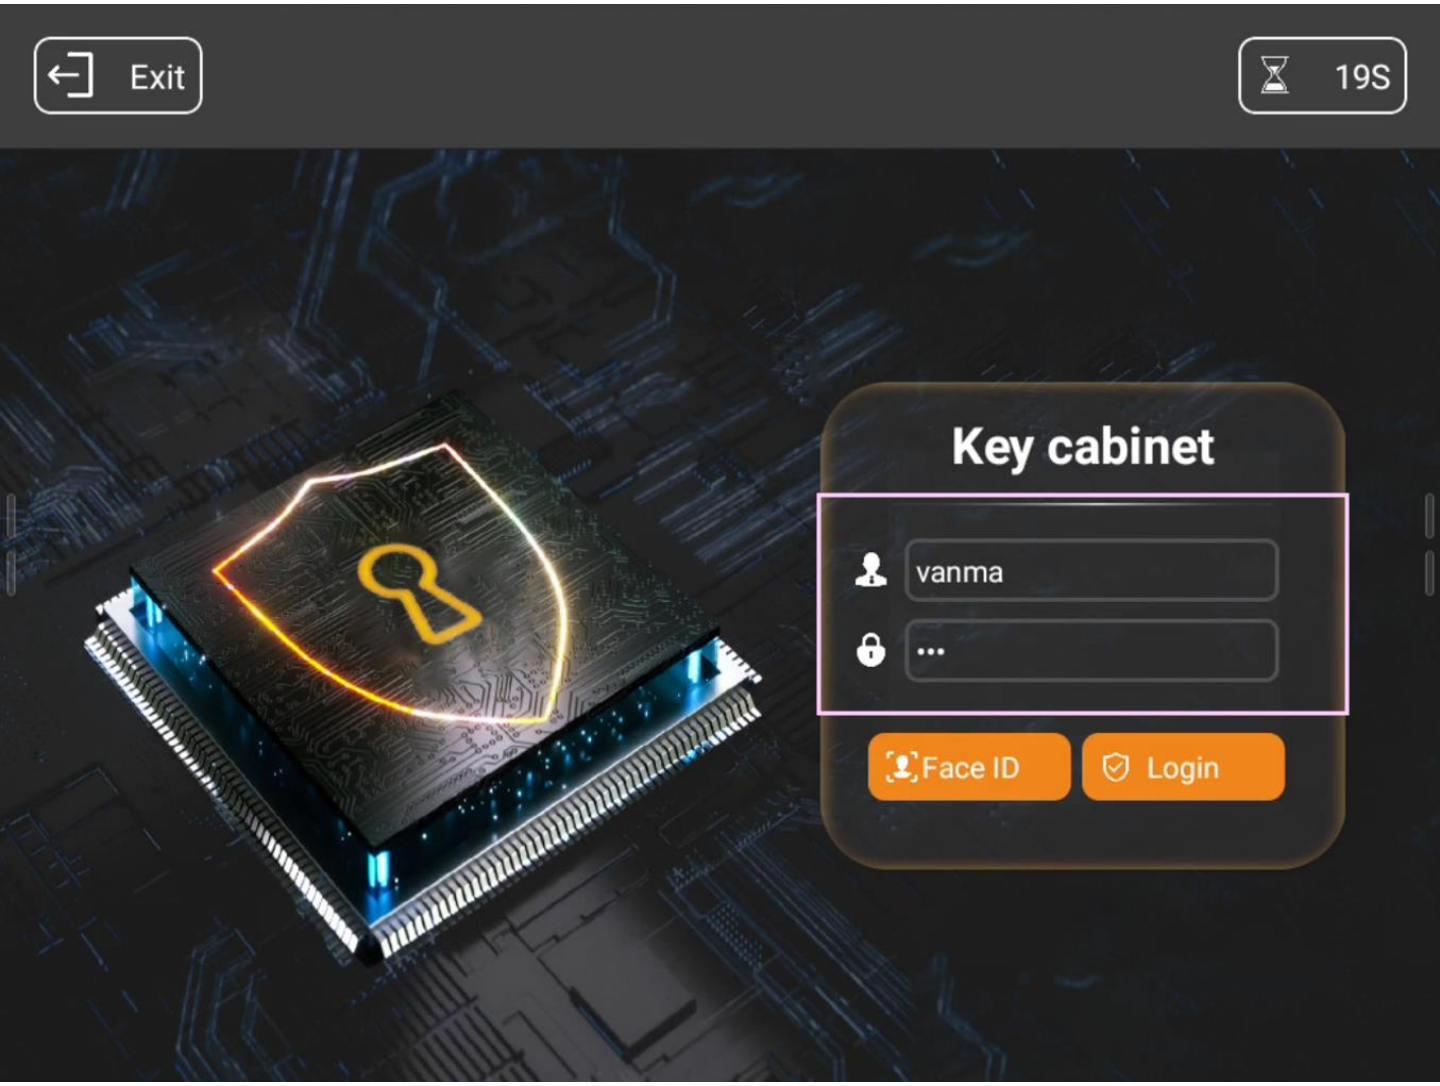
Vanma Lock

Key Cabinet Homepage



Let us press “Setting” to do the setup.

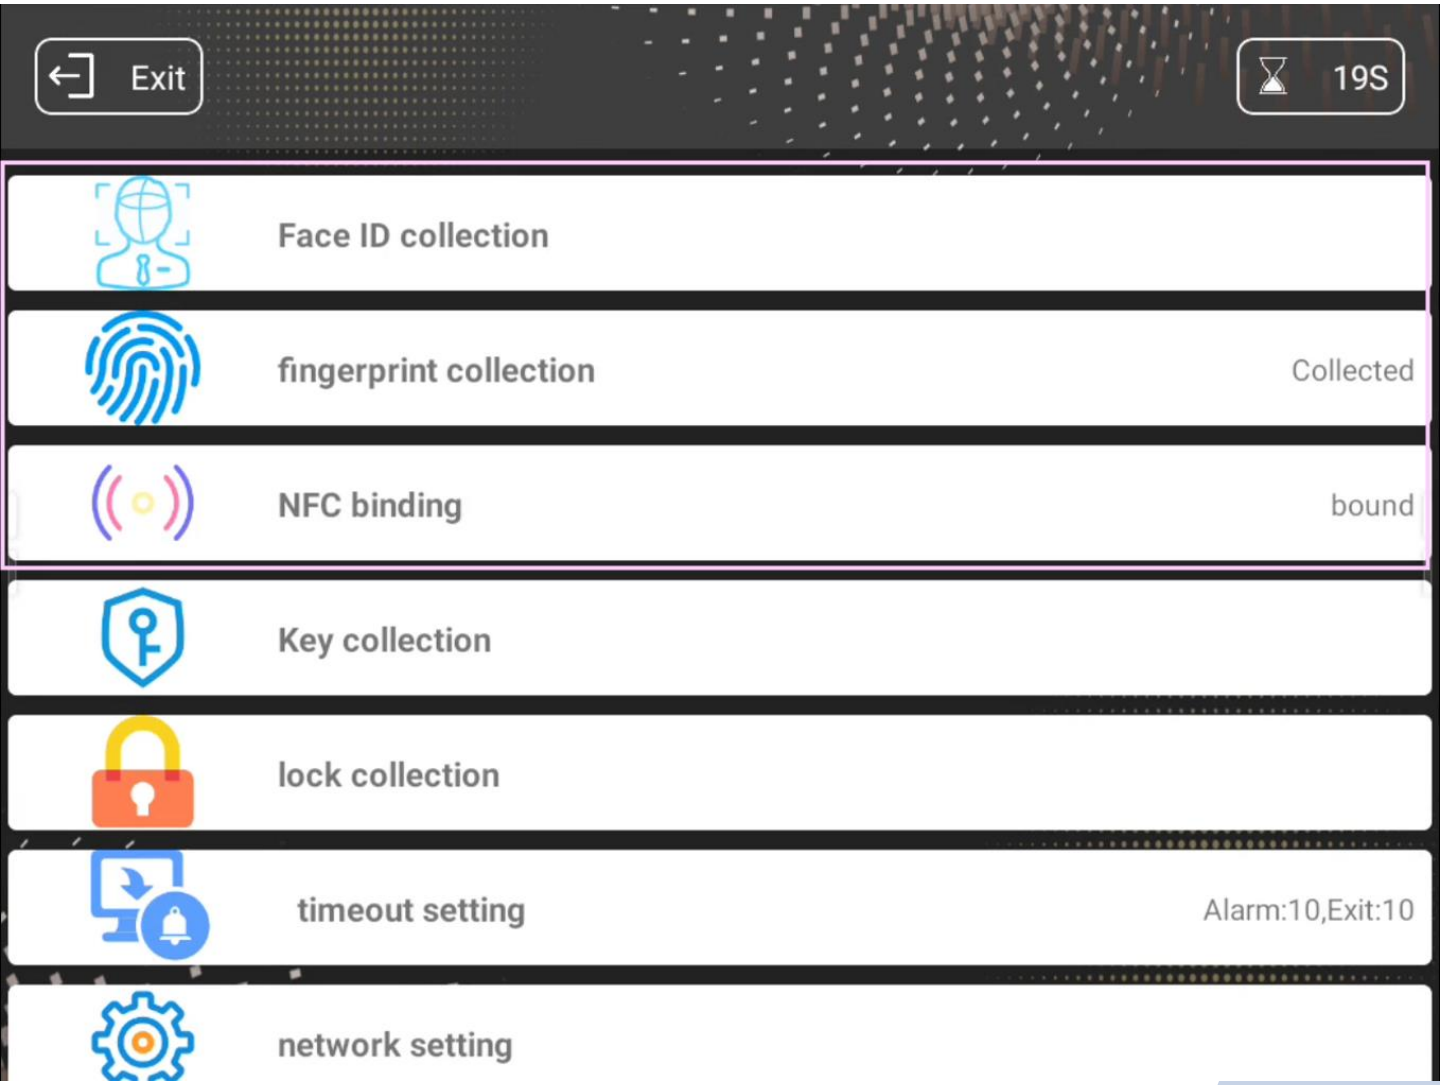
1. Login Key Cabinet



Input username and password that we have setup in software, then press “Login”.

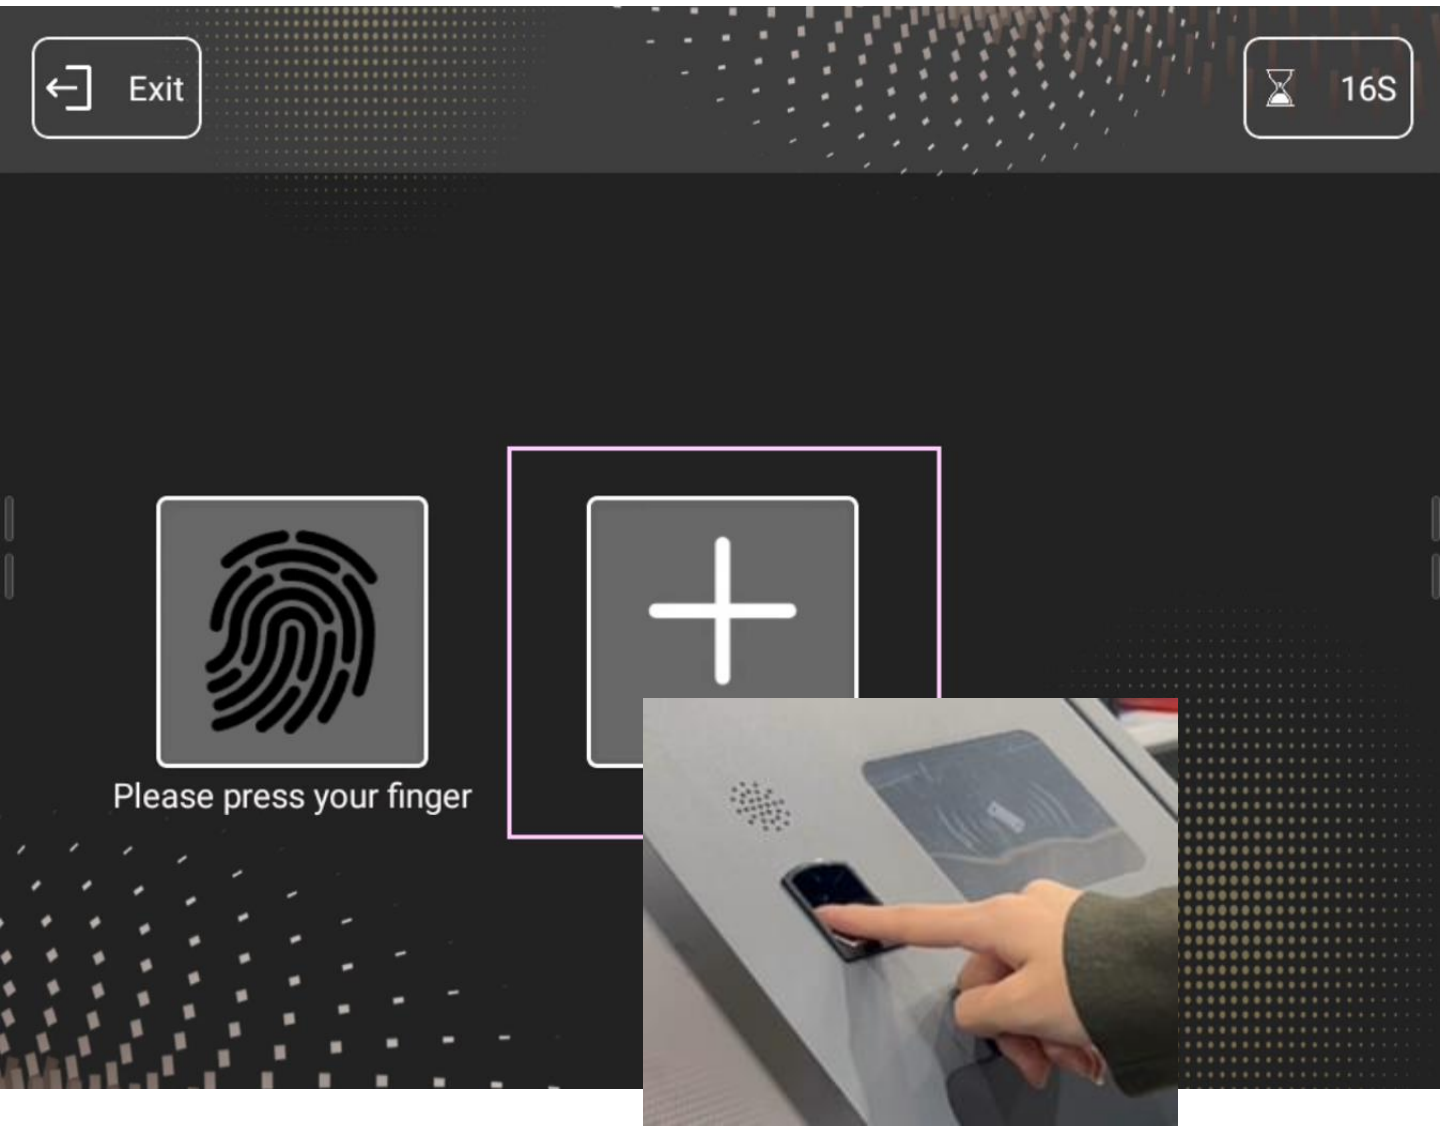
2. 3 Methods to Login

Except password, we could also choose **Fingerprint, NFC card** to login.



Let us collect our fingerprints now.

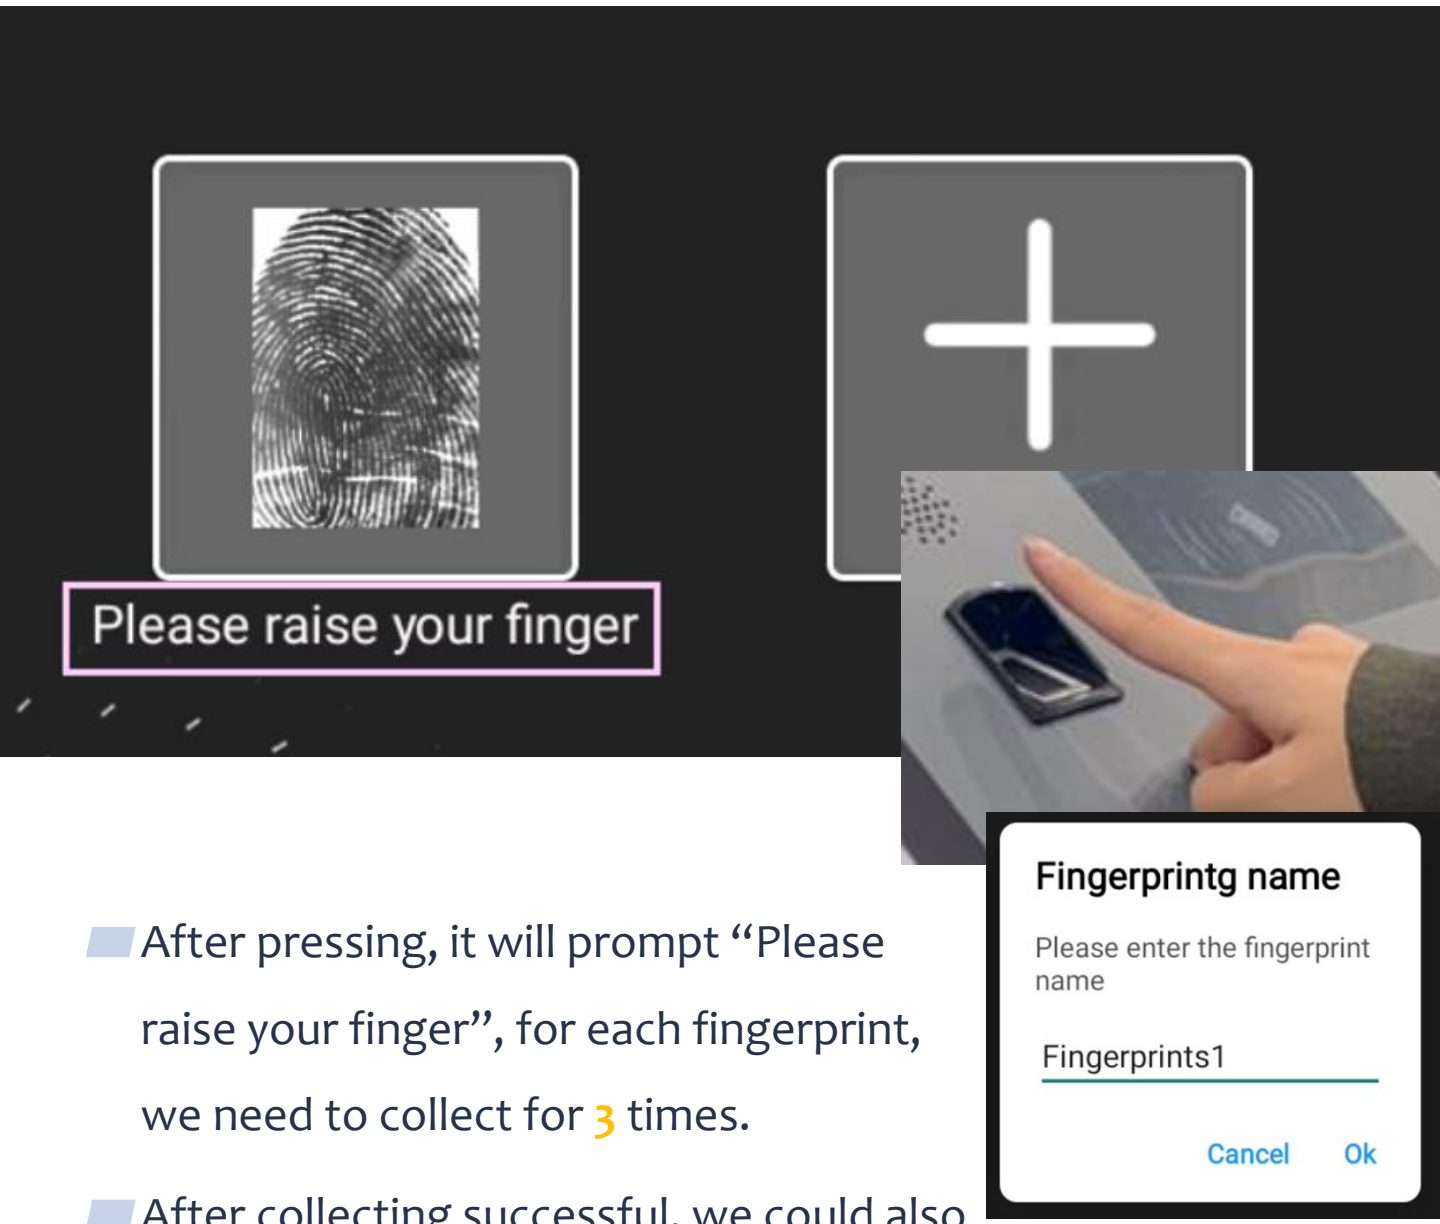
2. 3 Methods to Login (Fingerprint)



When you press “+”, there will be a voice prompt

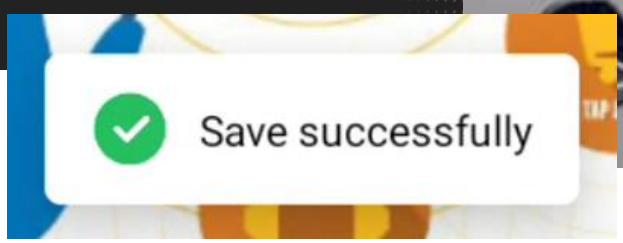
“Please press your finger”, same as the screen showed.

2. 3 Methods to Login (Fingerprint)



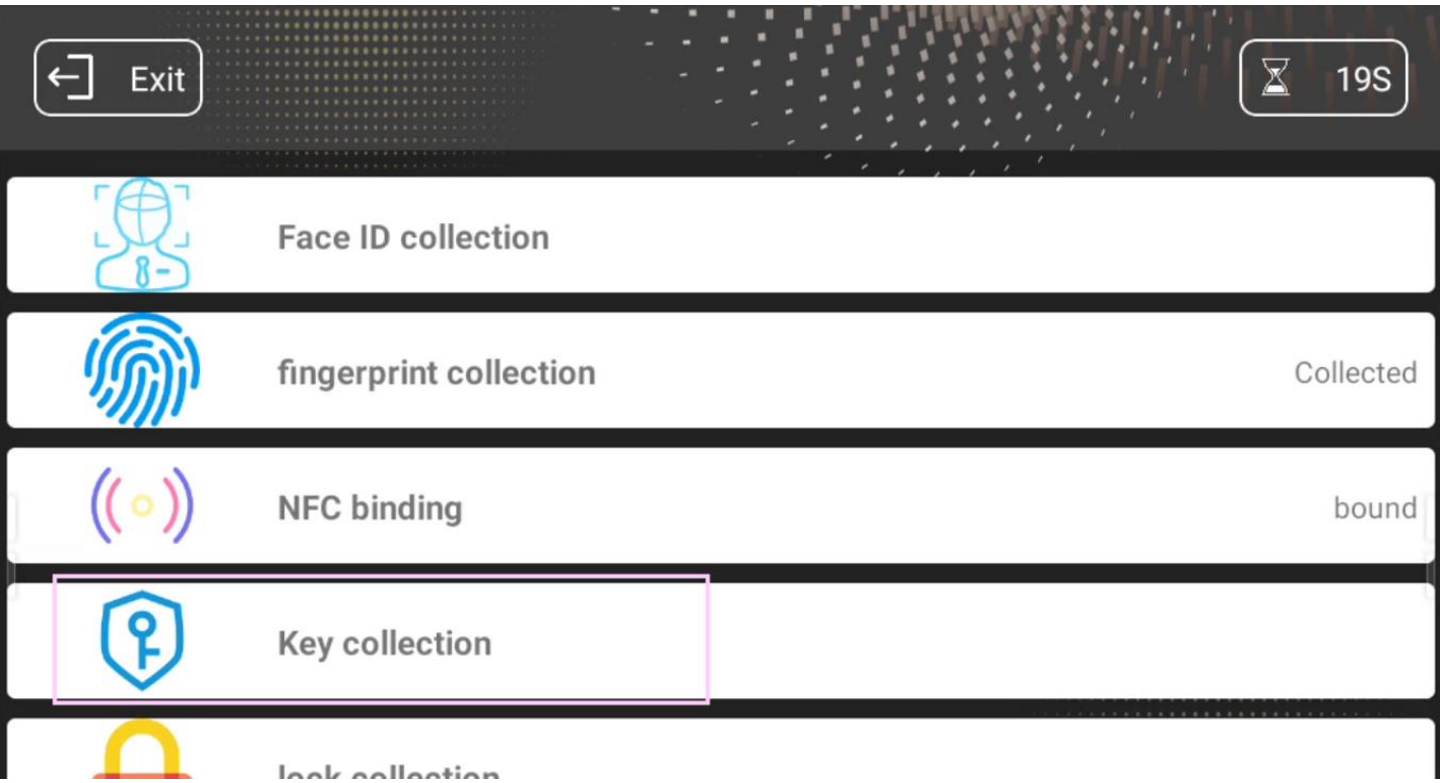
- After pressing, it will prompt “Please raise your finger”, for each fingerprint, we need to collect for 3 times.
- After collecting successful, we could also **name** these fingerprints.

2. 3 Methods to Login (NFC Card)

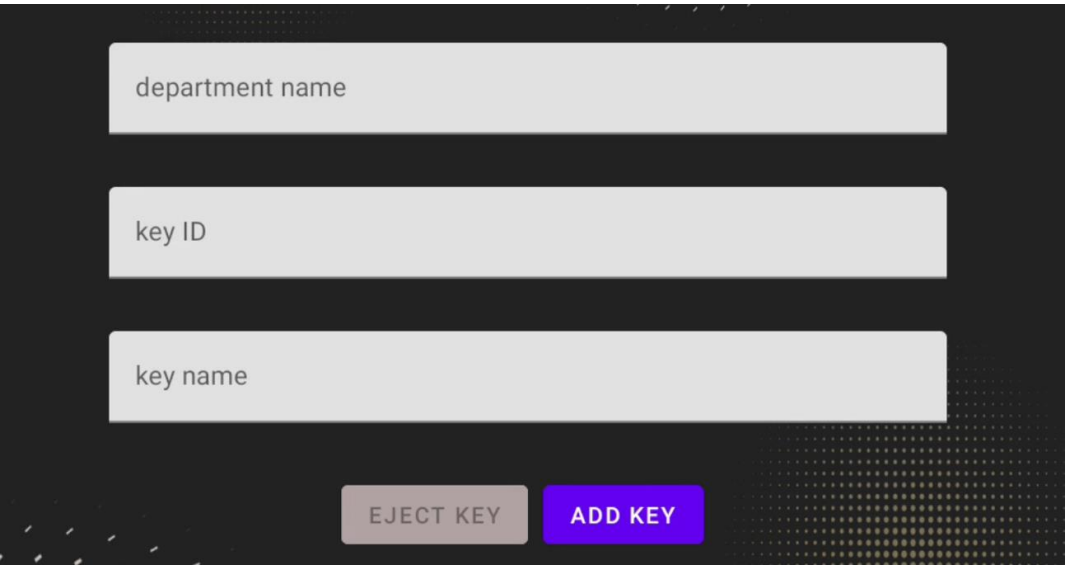


- Then we come to the next method which is NFC card.
- Move the card to the reading area, then you will see the prompt “Save successfully”.

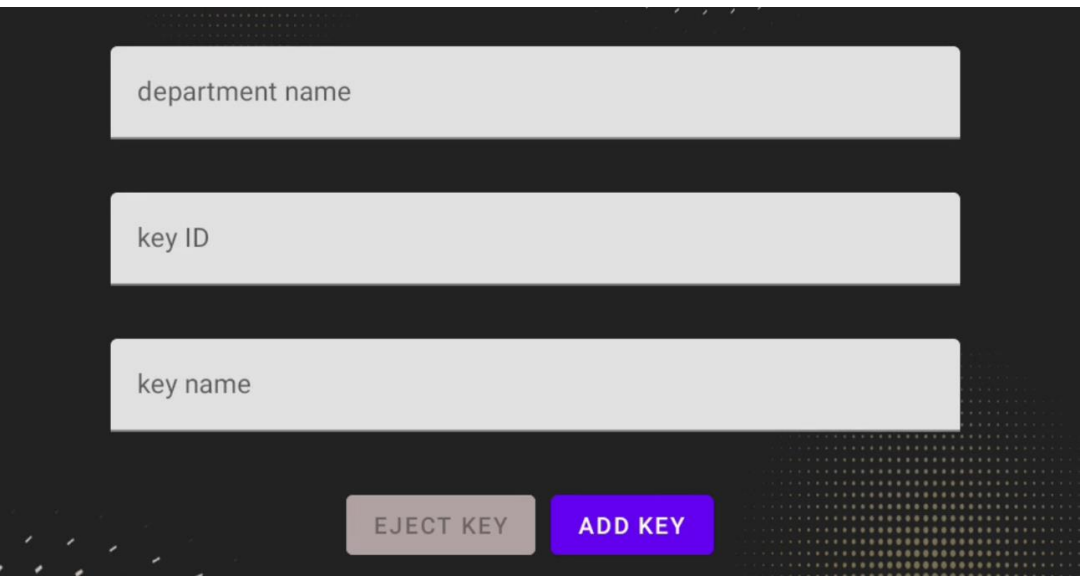
3. Key Collection



Now we can add key through key cabinet, let us press.



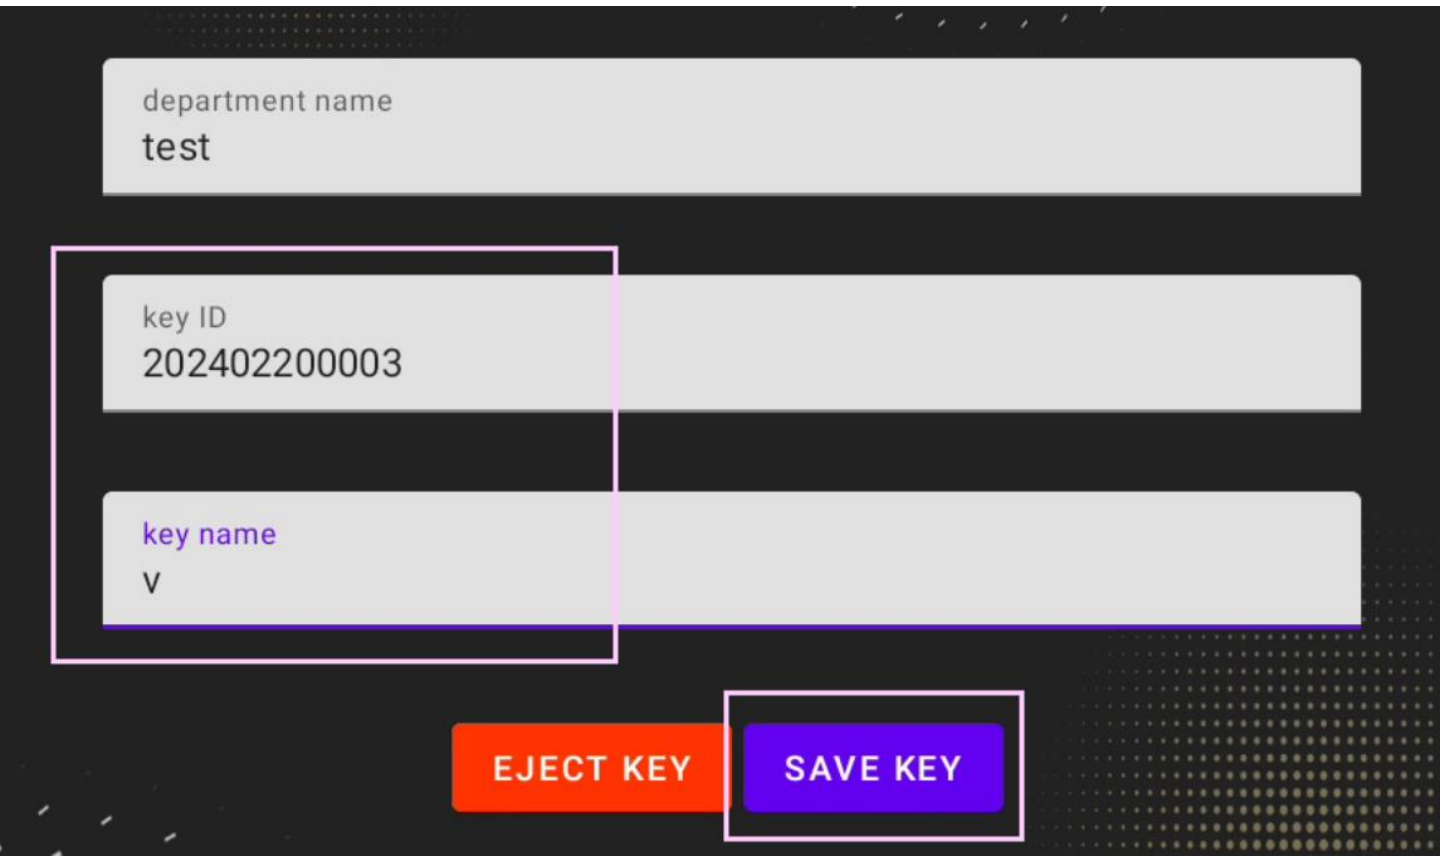
3. Key Collection



The department we have setup in the software, so now we can directly choose it.

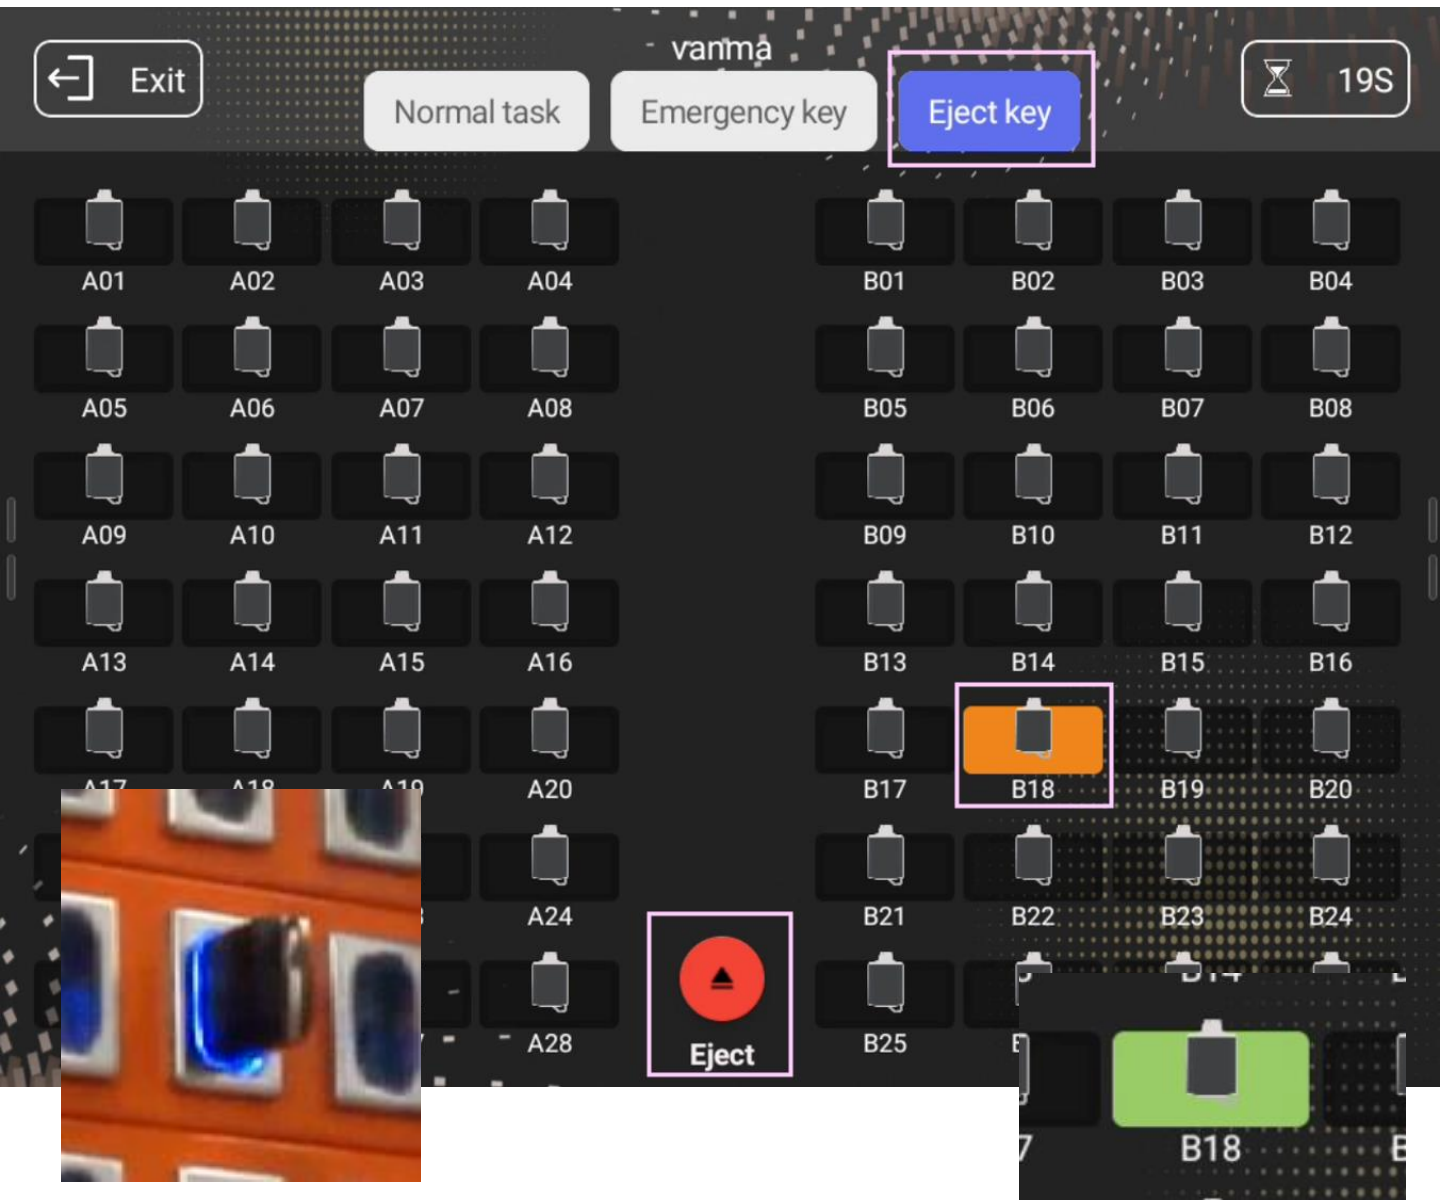
Now we need to press “ADD KEY”, the cabinet door will be opened automatically, and we can insert key to the slot, then close the door.

3. Key Collection



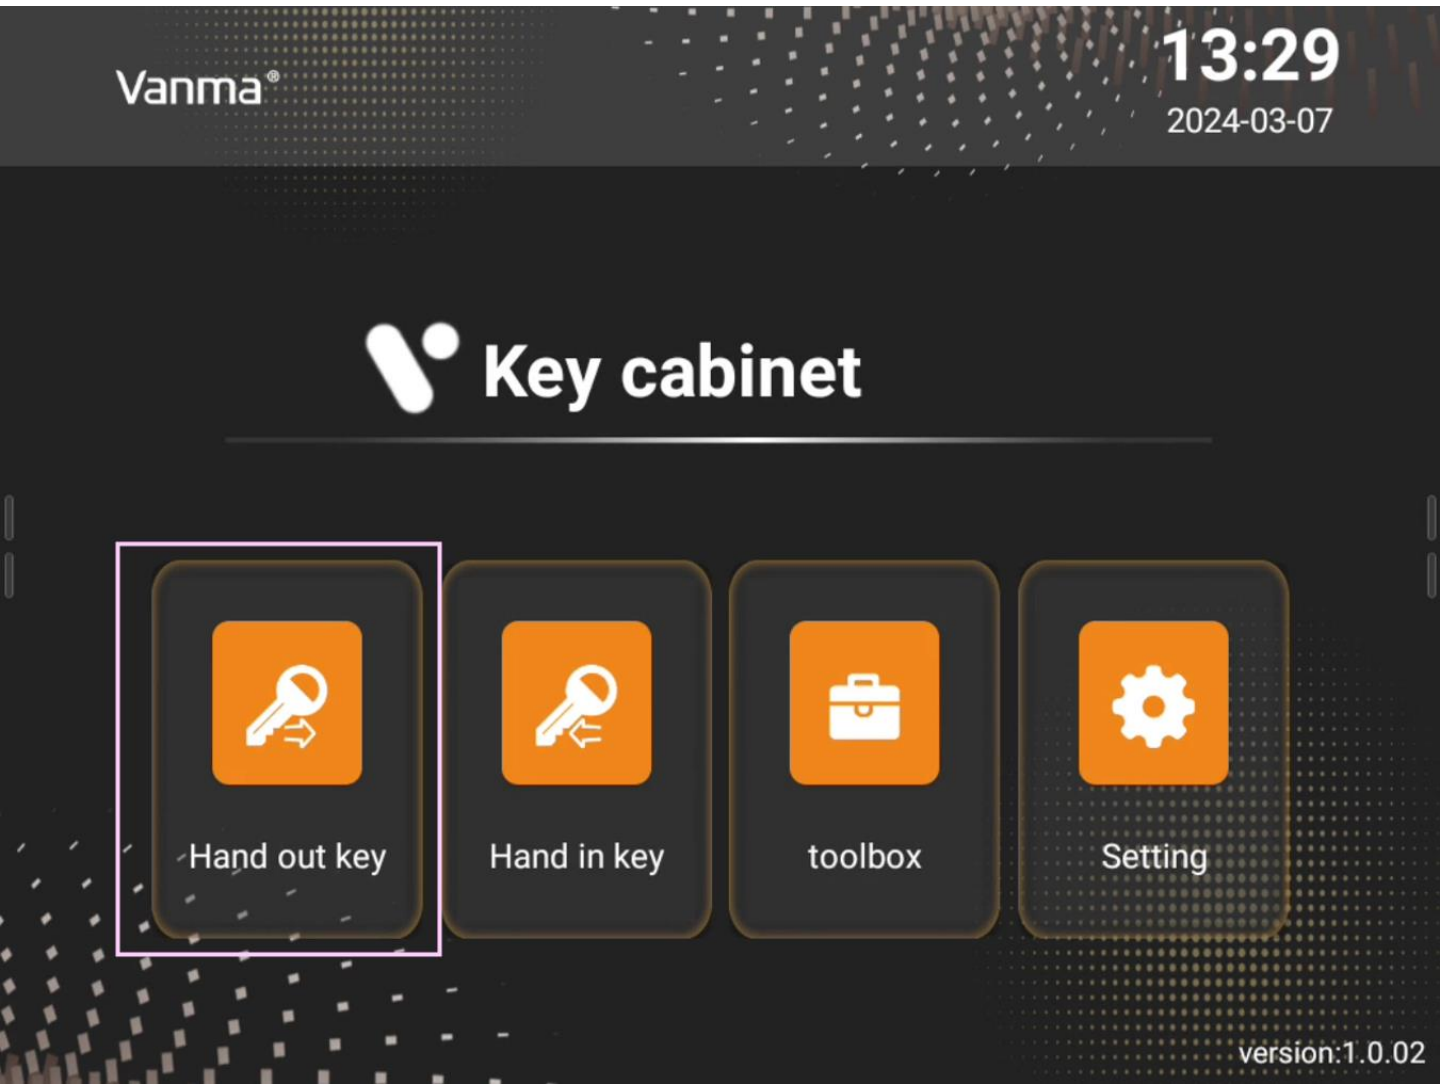
After inserting the key, the key ID will be filled in automatically, we could name this key, then press “SAVE KEY”.

4. Eject Key



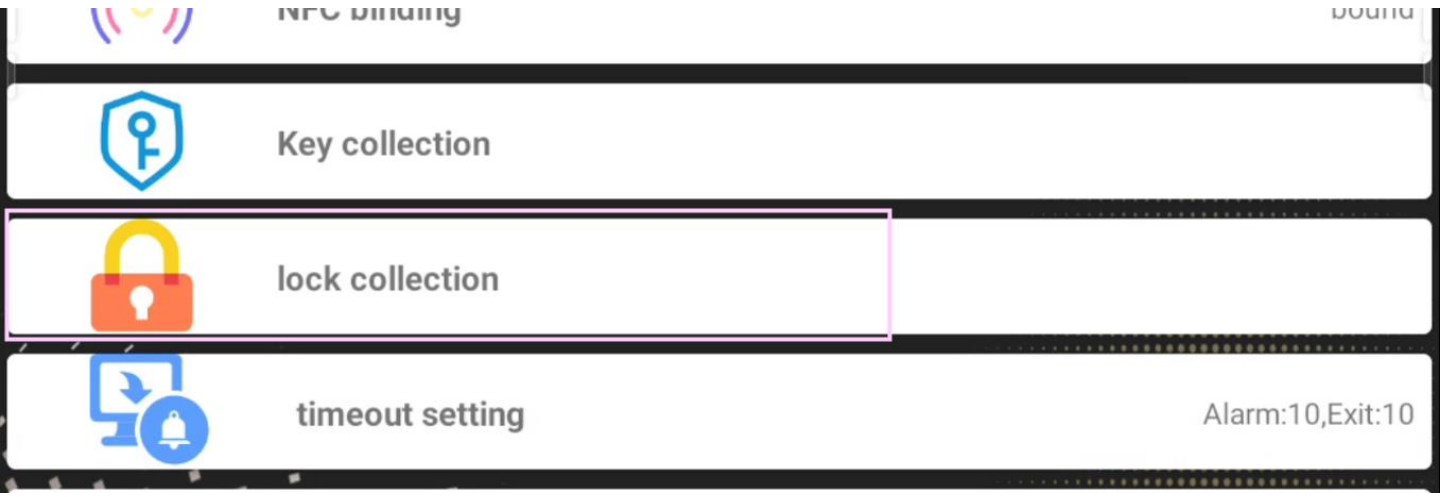
As we can see here, we could click the key (from orange to green color) and press "Eject" in red button, then the door will be opened and the slot will flash which means we can take this key out now.

4. Eject Key



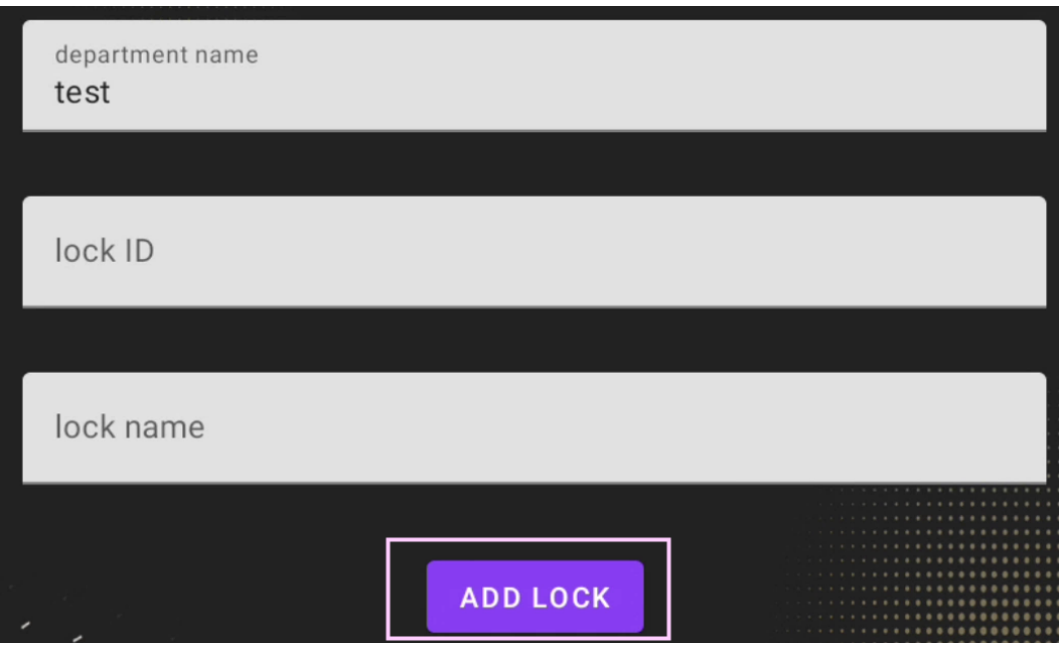
We could hand out key here, press “Hand out key”, then log in (3 methods we can choose).

5. Lock Collection

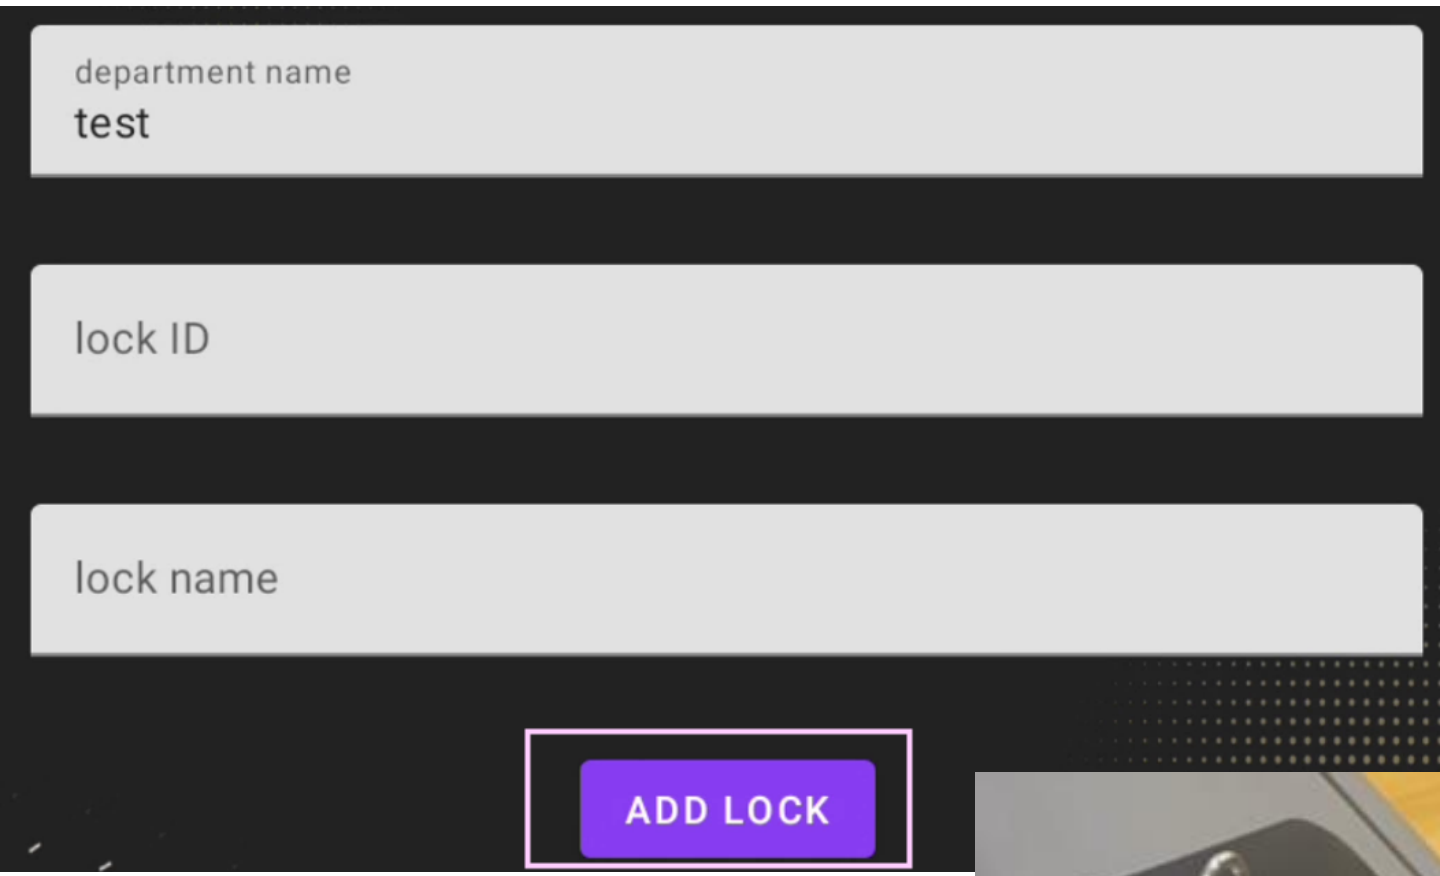


Now we press “lock collection”, let us fill in the department, same as key collection.

Then we press “ADD LOCK”



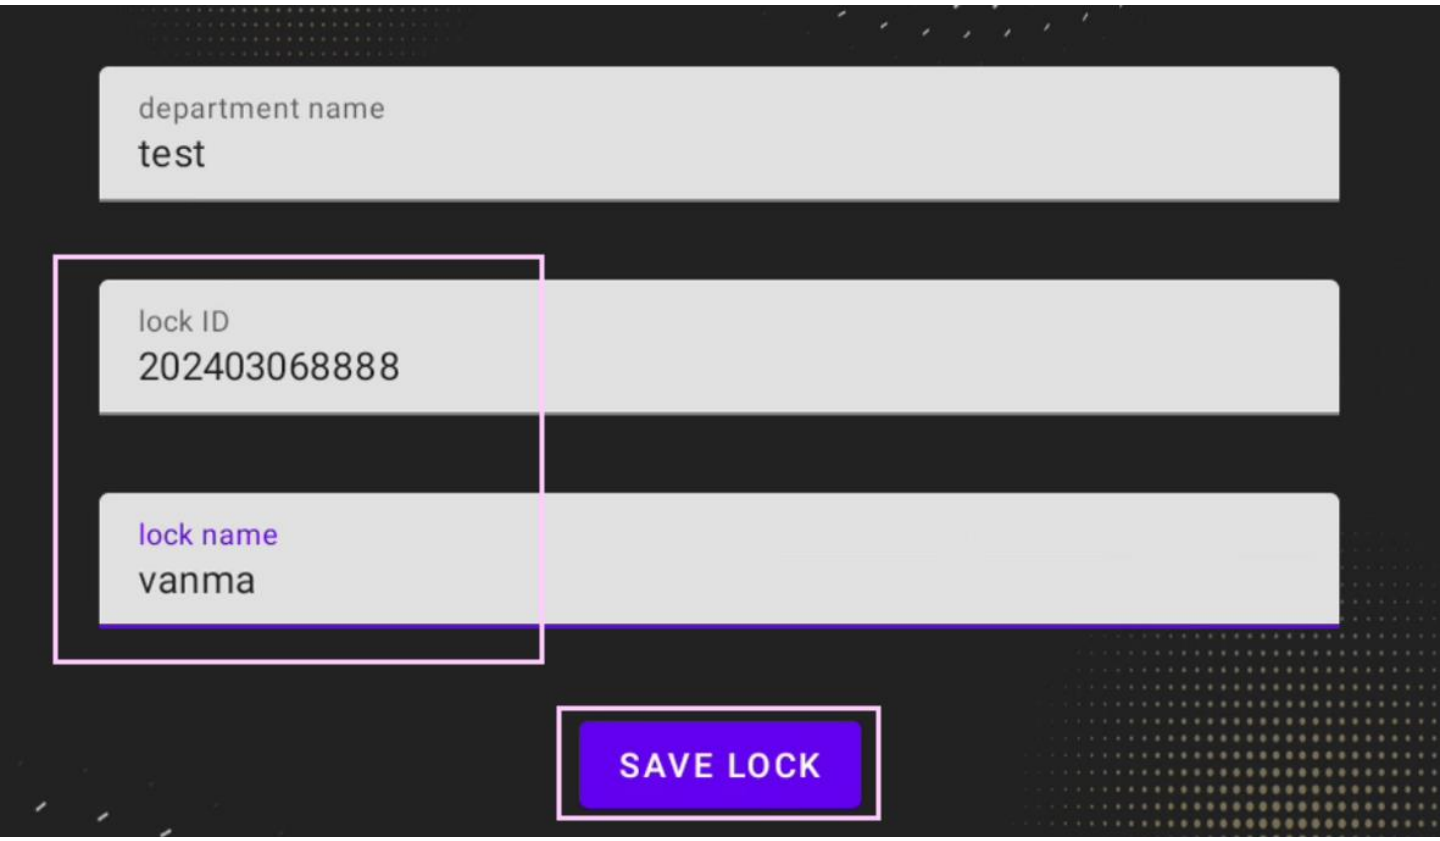
5. Lock Collection



Now we come to “lock collection”, let us fill in the department, same as key collection.

We need to press “ADD LOCK” first, then put lock on the dock station.

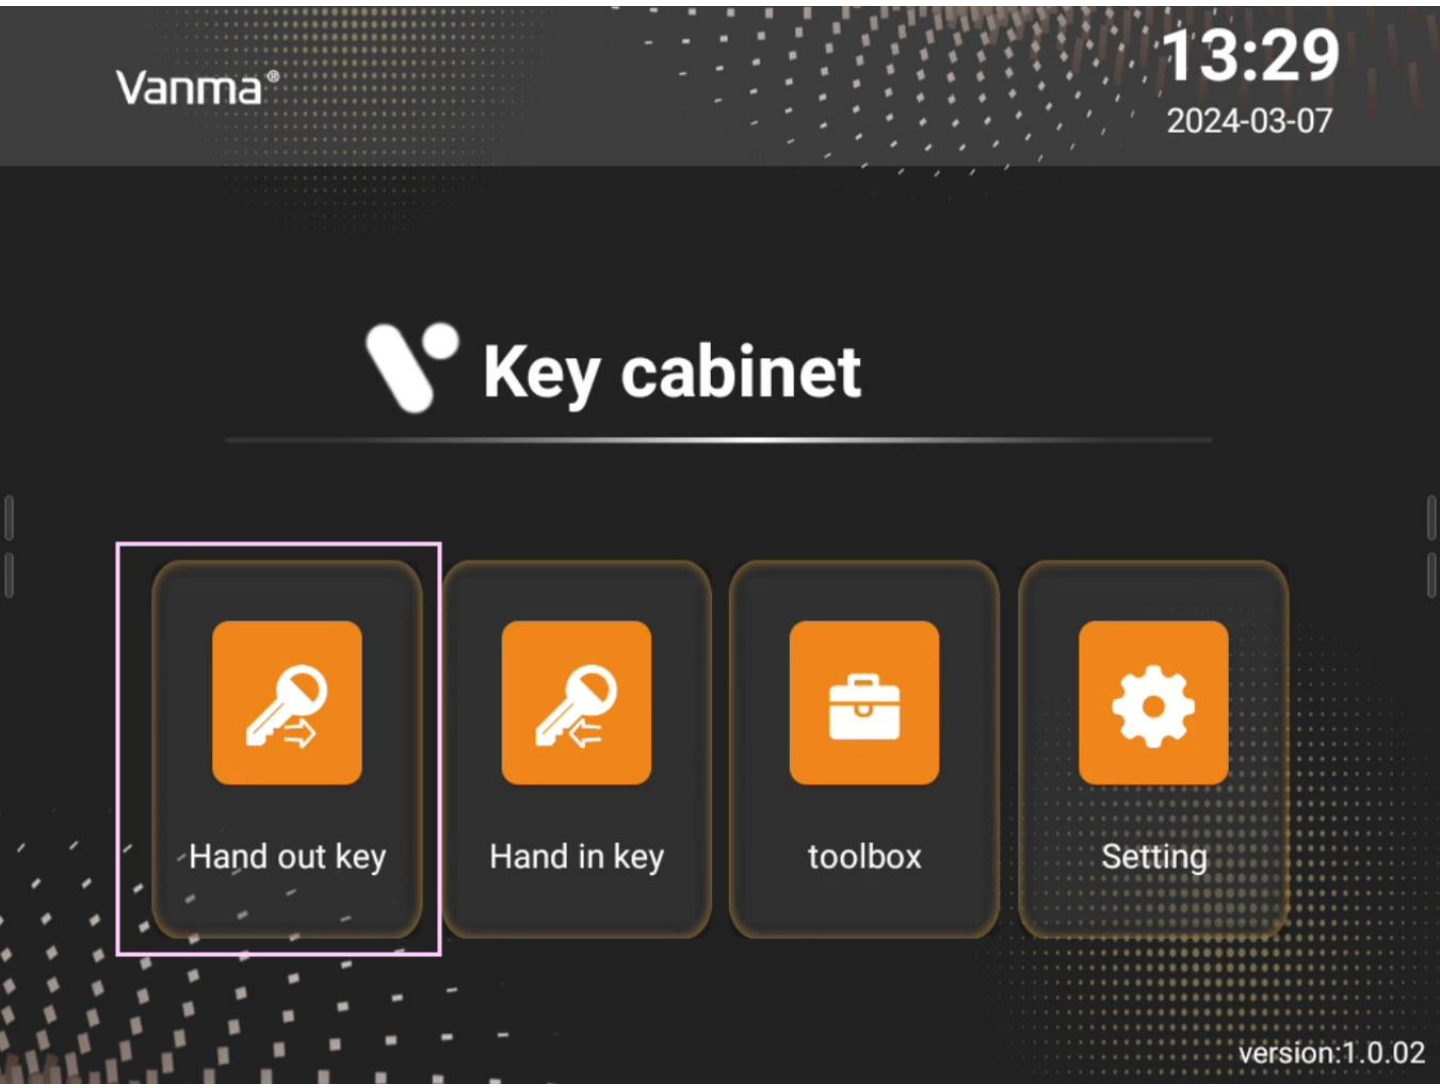
5. Lock Collection



Same as key collection, the lock ID will be filled in automatically, and we can name the lock.

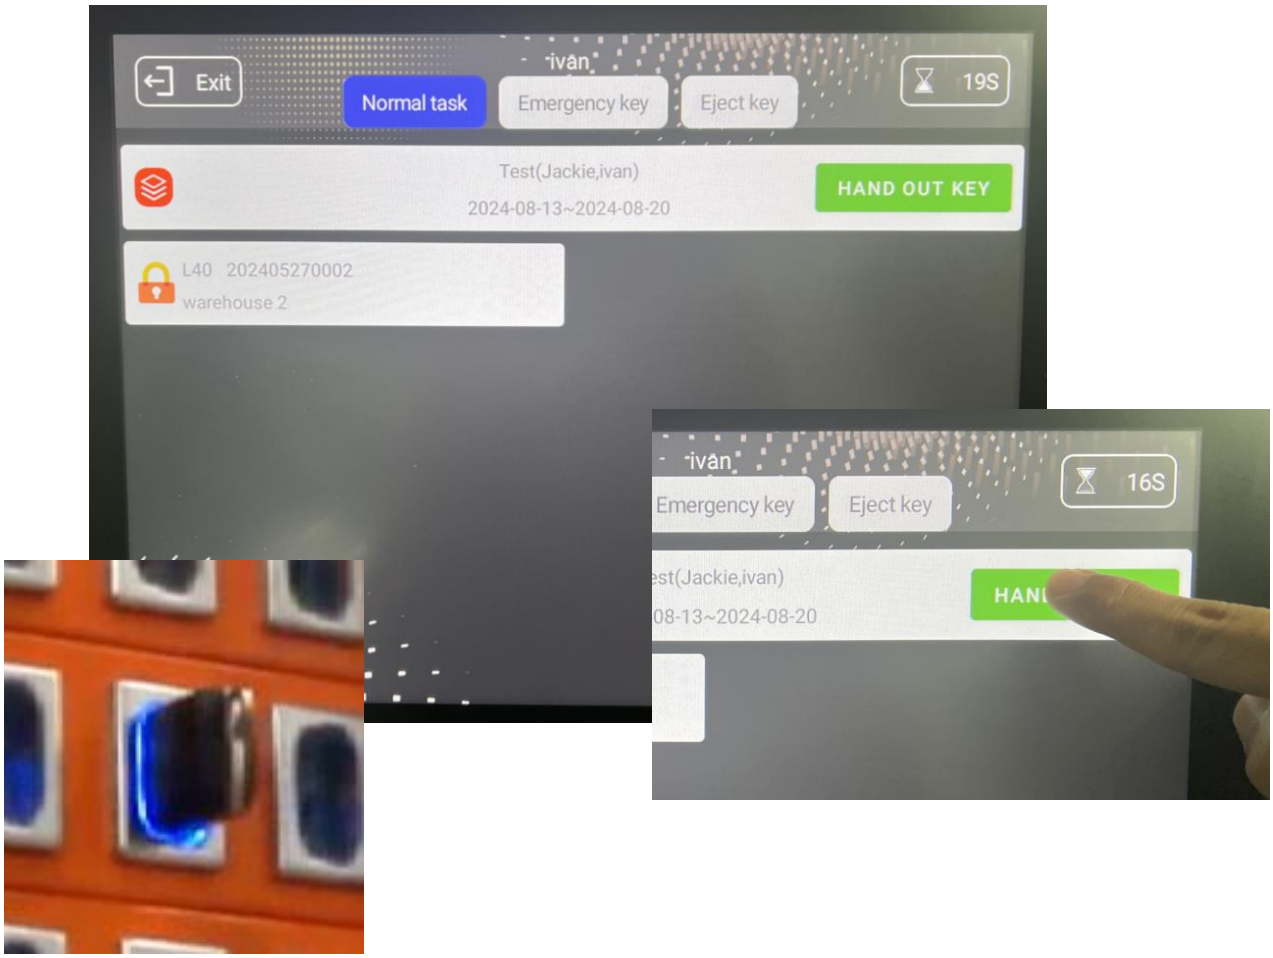
Then let us press “SAVE LOCK”.

6. Hand out Key (Normal Task)



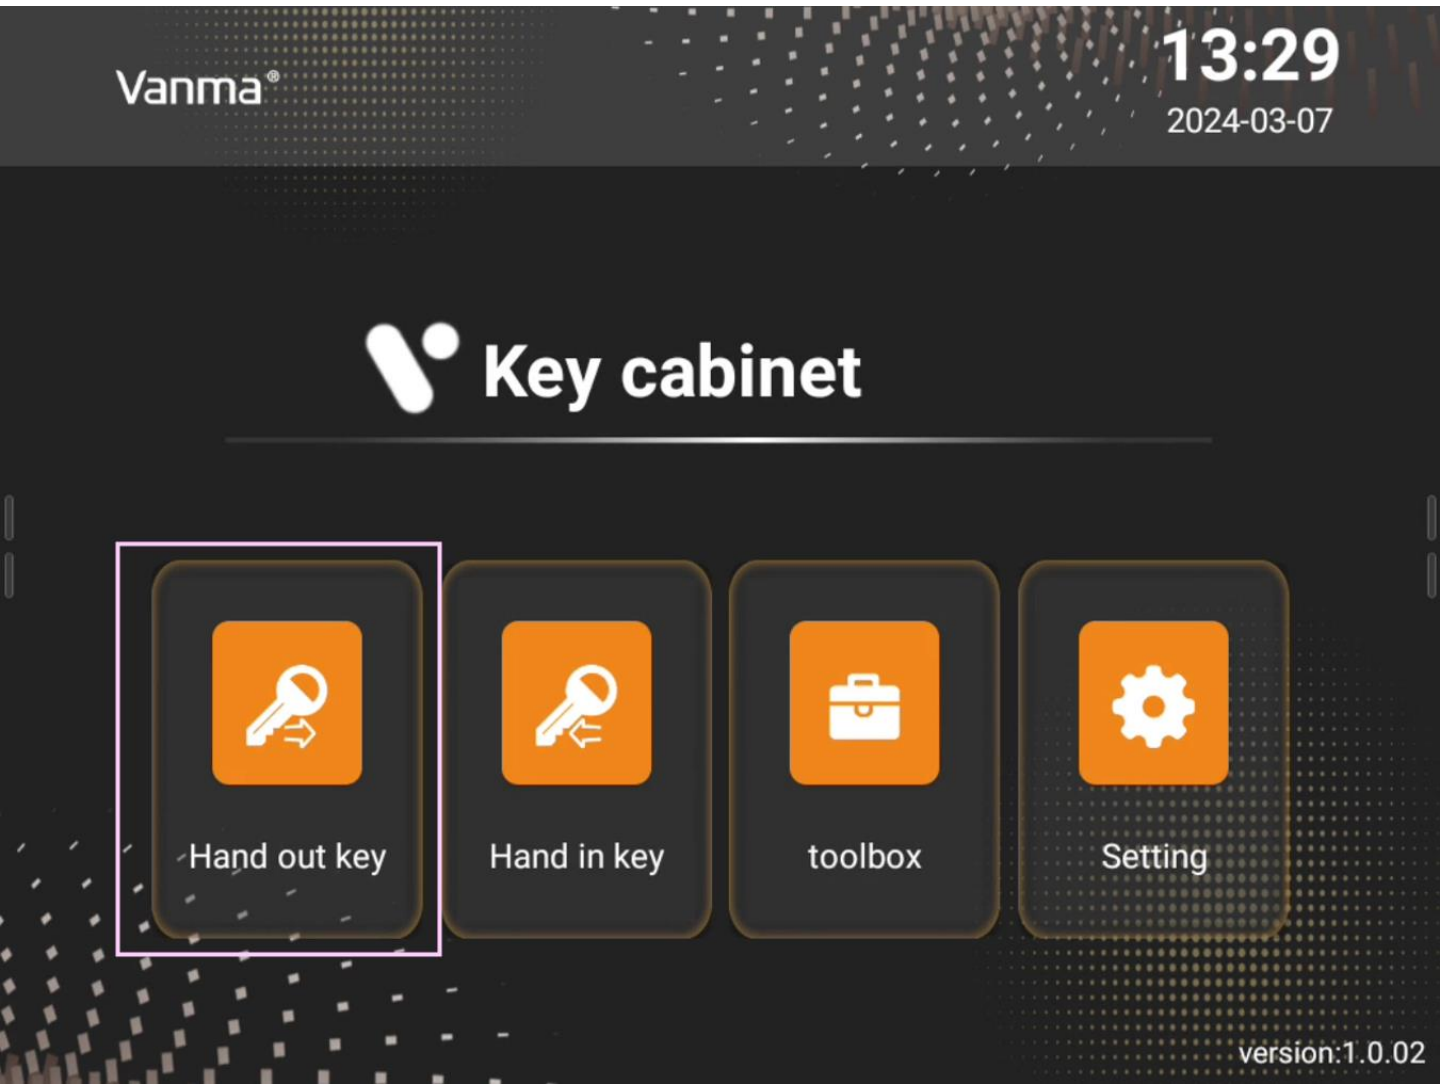
We could hand out key here, press “Hand out key”, then log in (3 methods we can choose).

6. Hand out Key (Normal Task)



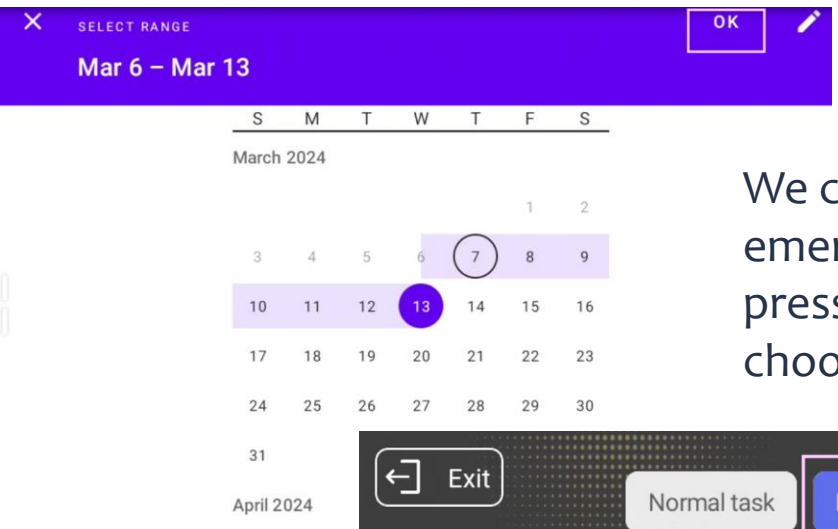
As we can see here, there is a task with the key inserted. Now we could click “HAND OUT KEY”, then we could use the key to execute the task.

6. Hand out Key (Emergency Key)

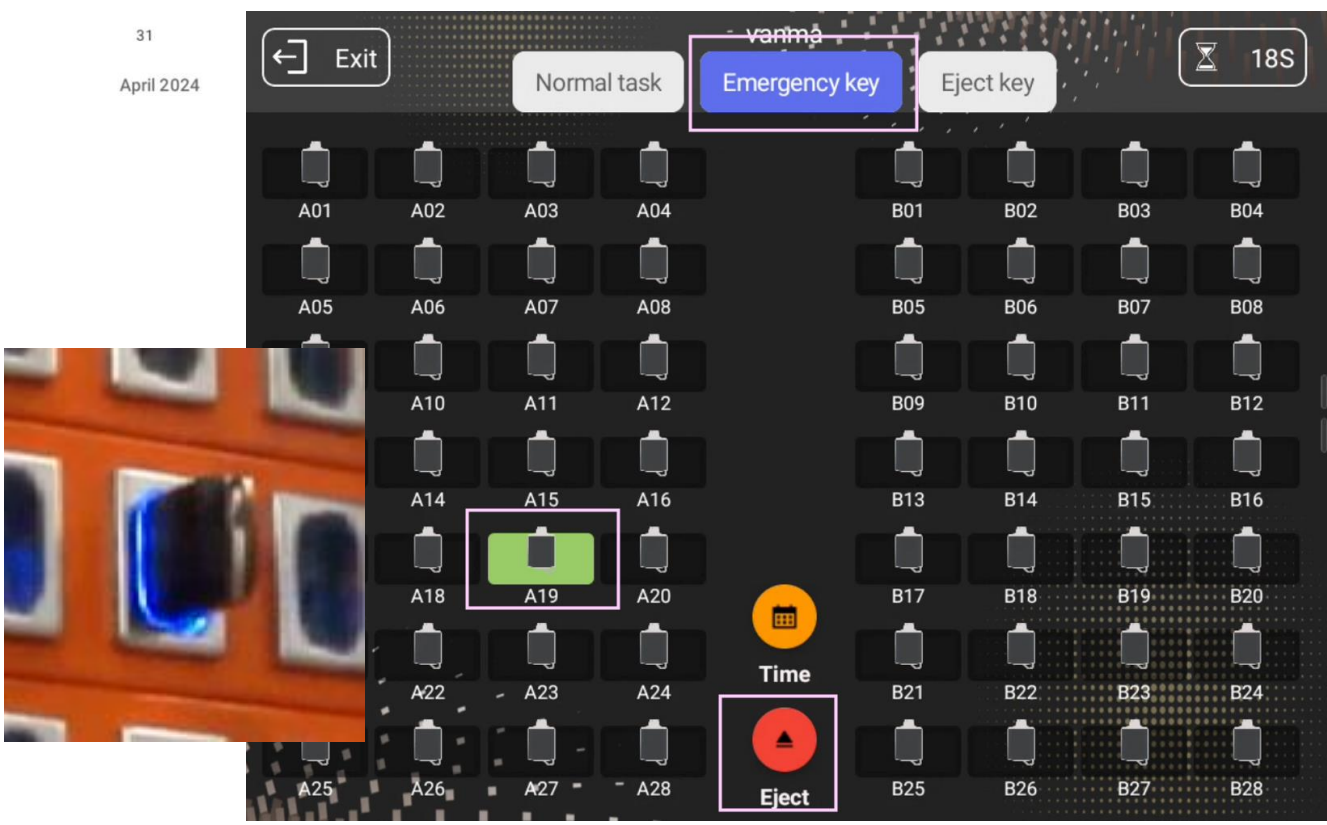


We could also to setup an emergency key that can unlock all registered locks.

6. Hand out Key (Emergency Key)

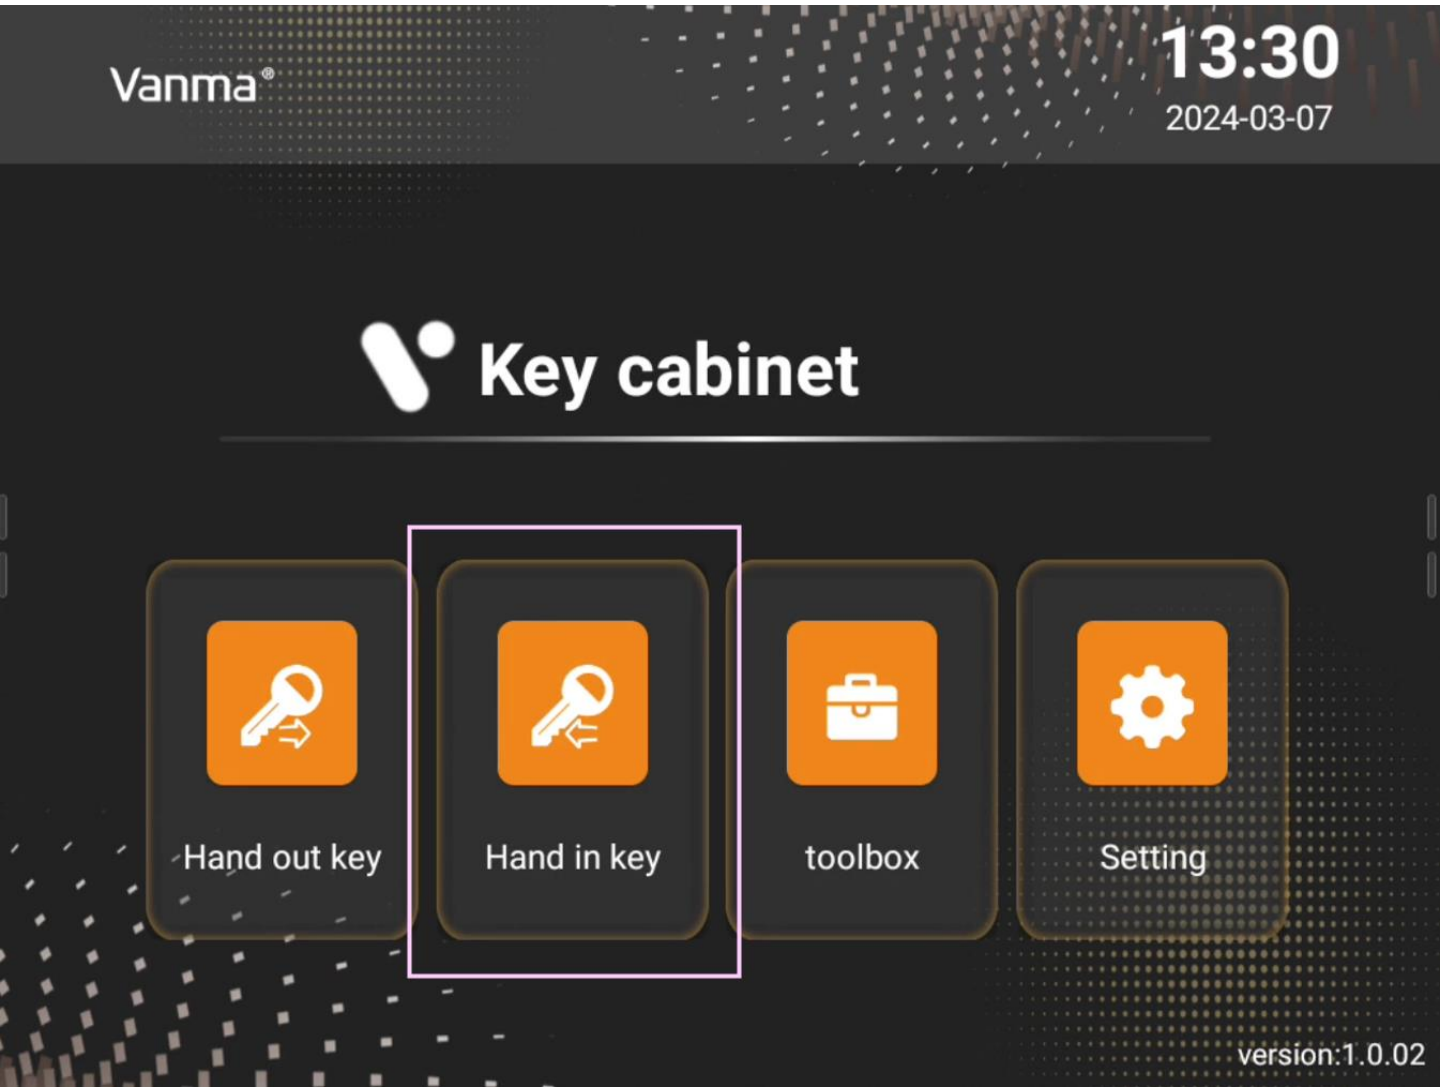


We can set the time for this emergency key, press “Time”, press “ok” to save it after choosing .



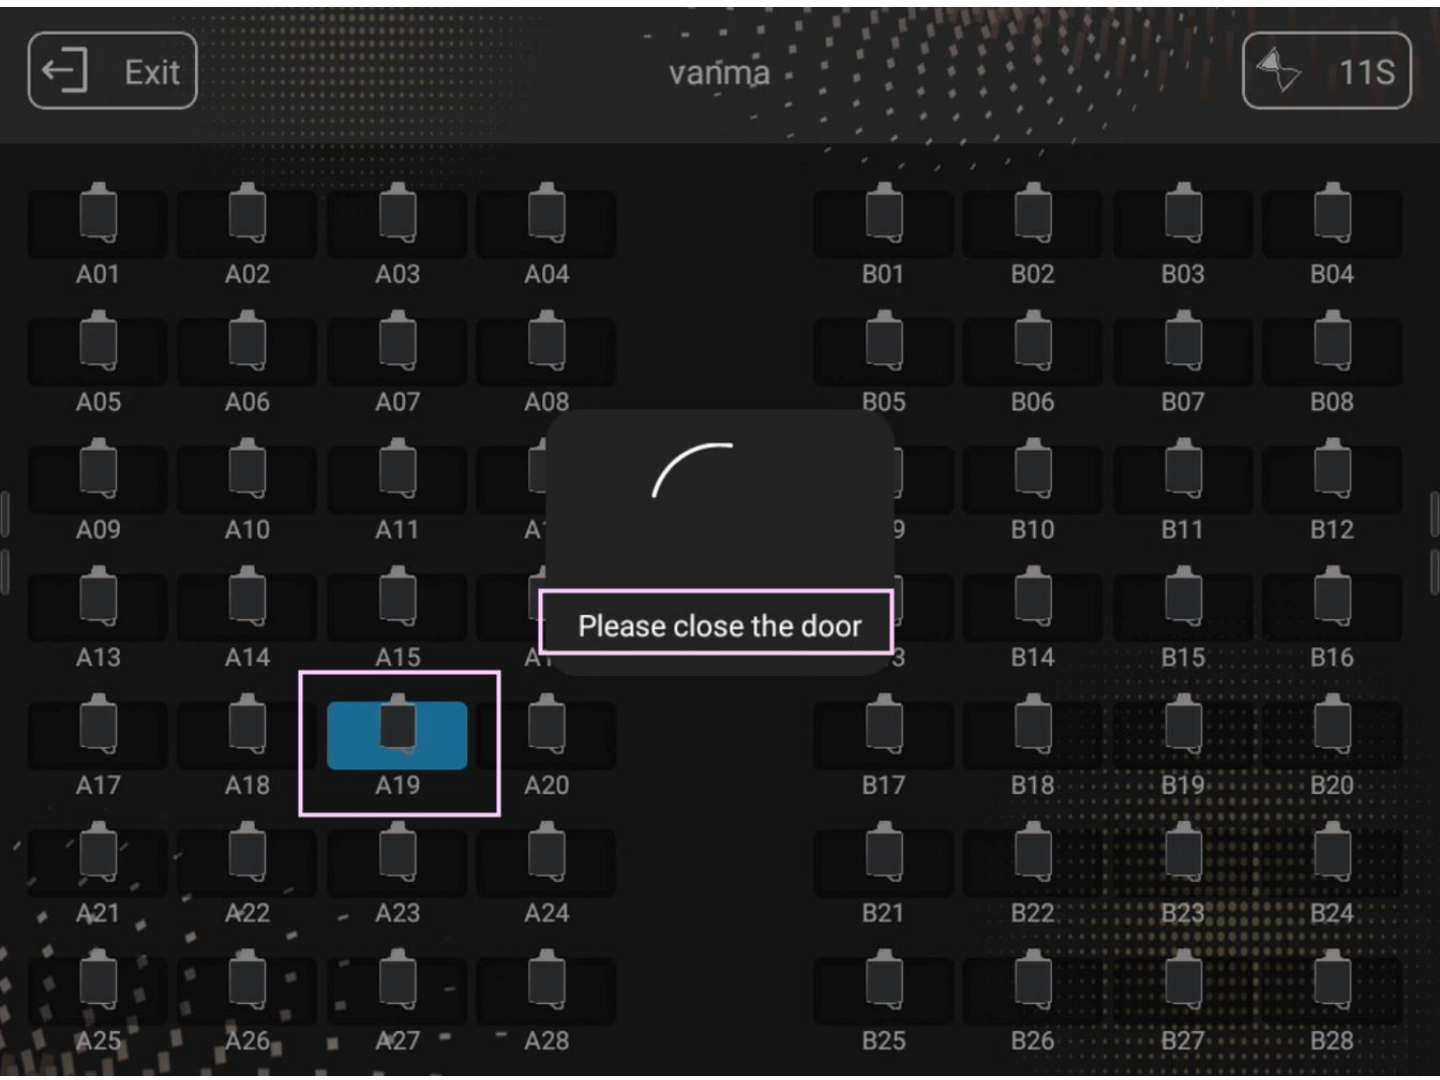
We could choose the key we want and press “Eject” in red button, then the door will be opened and the slot will flash which means we can take this key out now.

7. Hand in Key



We could hand in key here, press “Hand out key”, then log in (3 methods we can choose).

7. Hand in Key



When we insert key, the slot in screen will marked with blue color, and it will prompt you to close the door.

📖Now the quick start guide manual is end.
