# Contents

Vanma

1. Download APP
2. Login APP
3. Register Key

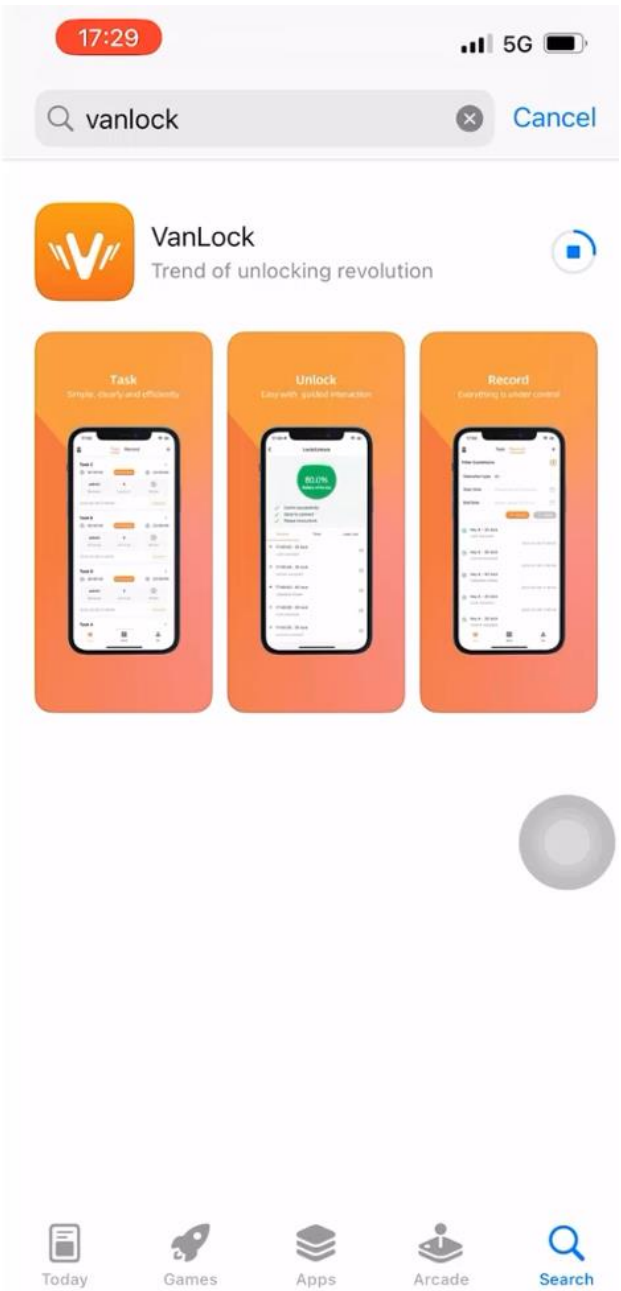
Vanma

4. Register Lock
5. Set Blacklist

Vanma

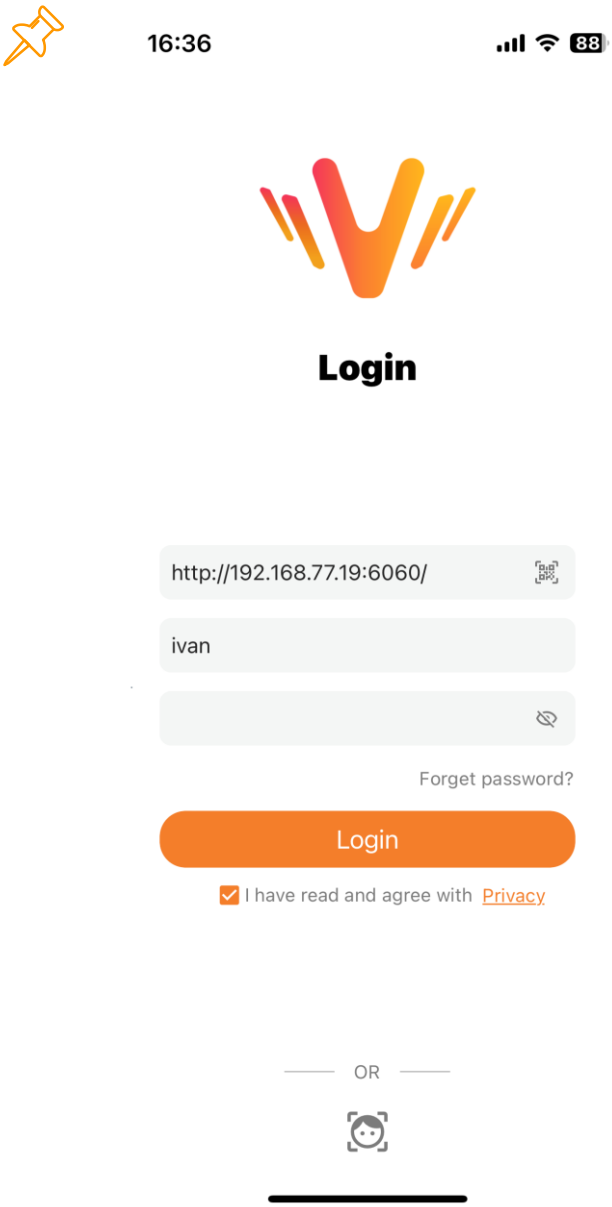
6. Temporary Plan

# 1. Download APP

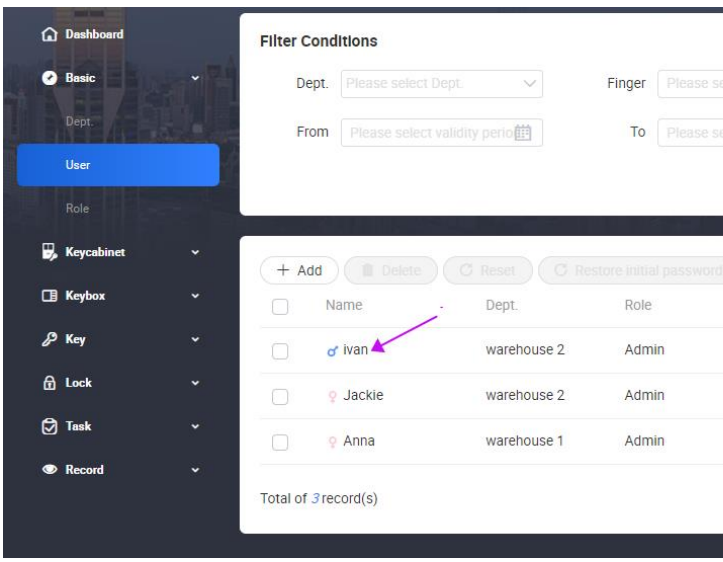


Search Vanlock APP in APP store and download it.

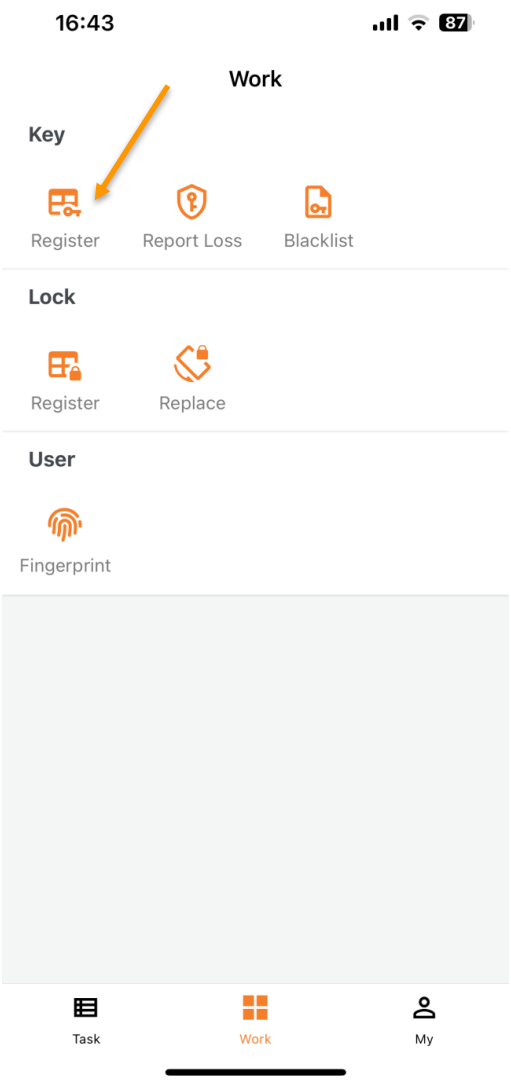
# 2. Login APP



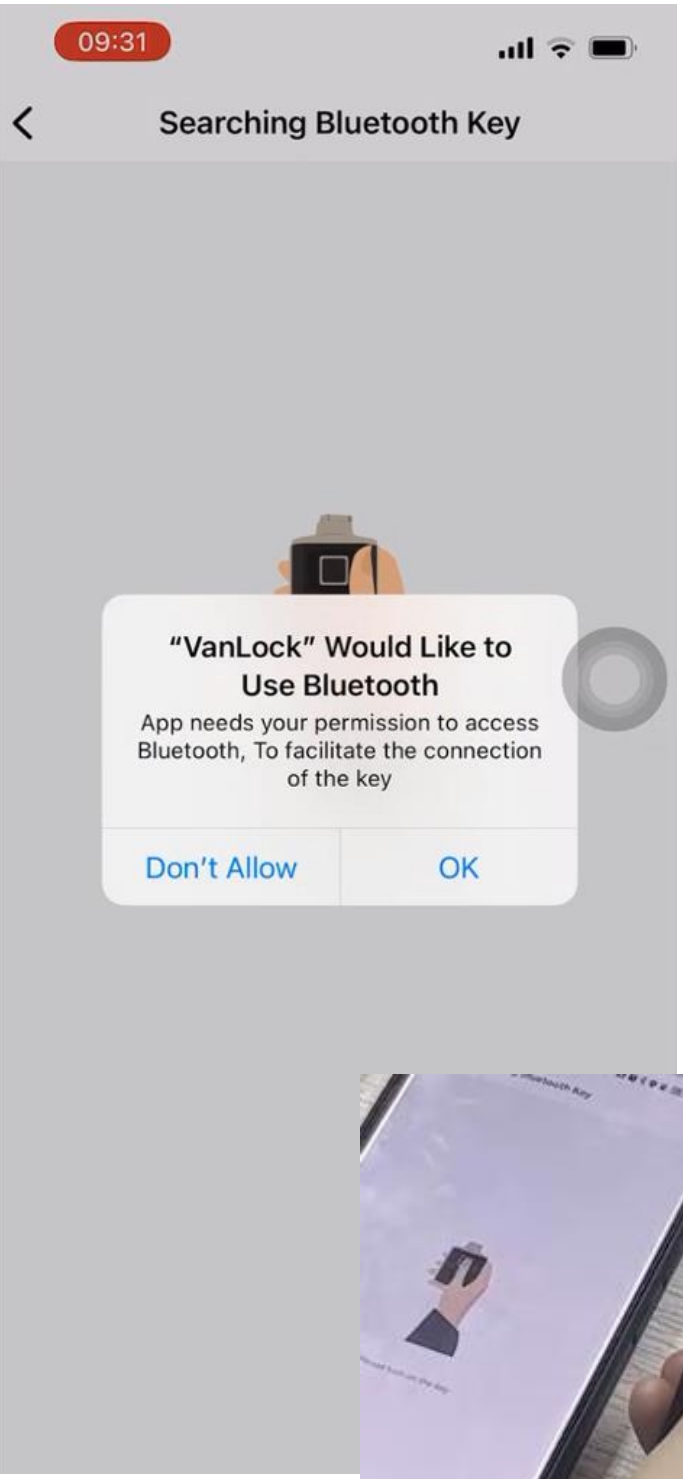
Input server address, user name (check from your platform user list), and password (default 999).



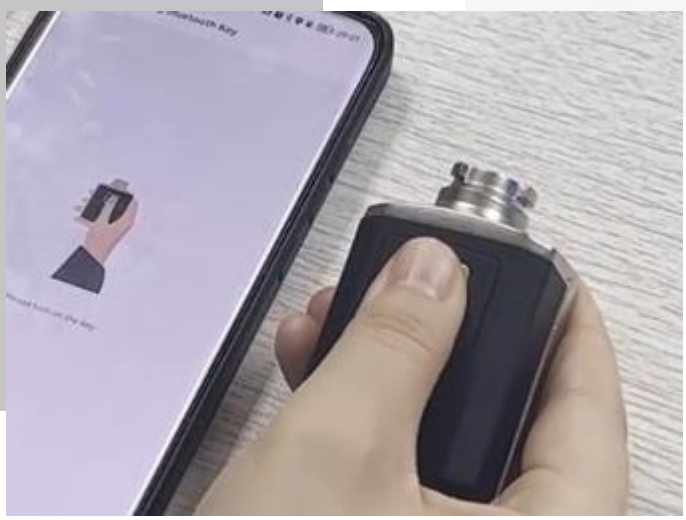
# 3. Register Key

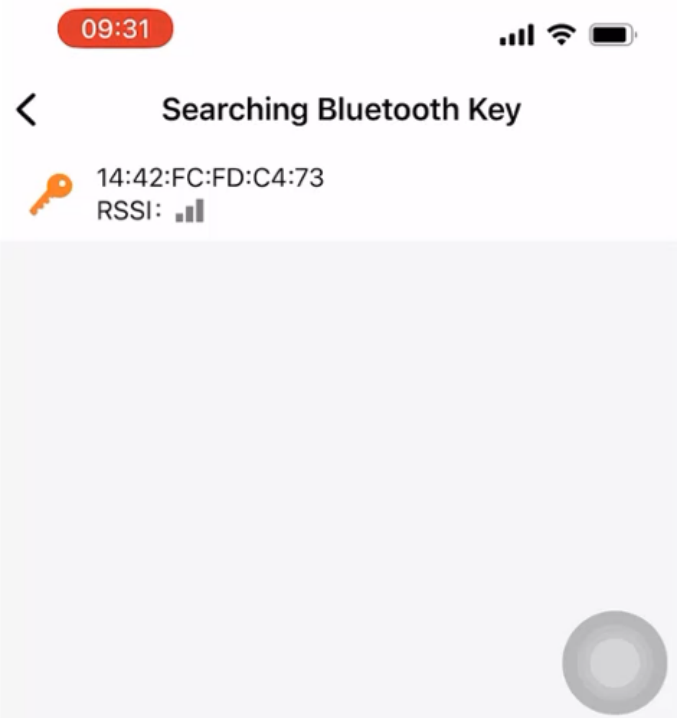


Click “Register” to add a Vanma key.



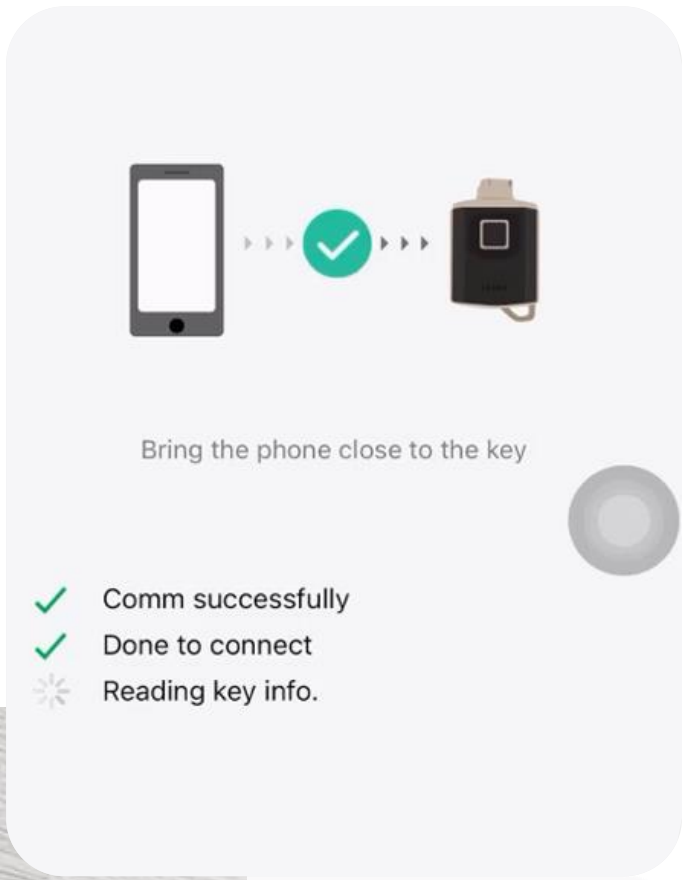
We need to long touch the fingerprint sensor to activate Bluetooth for connection.

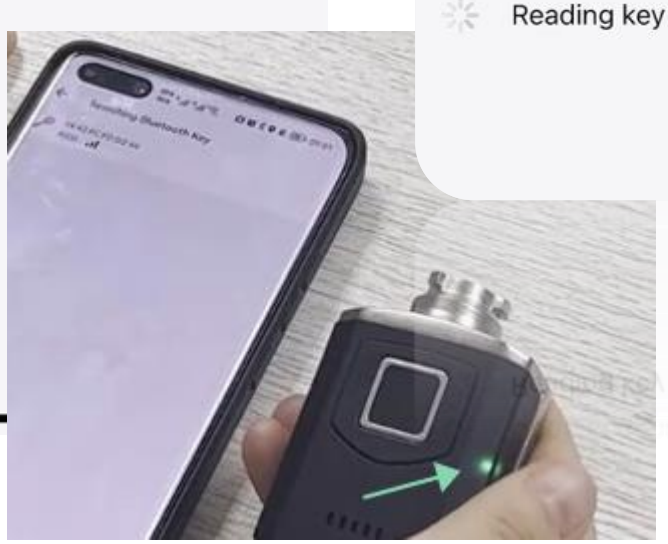




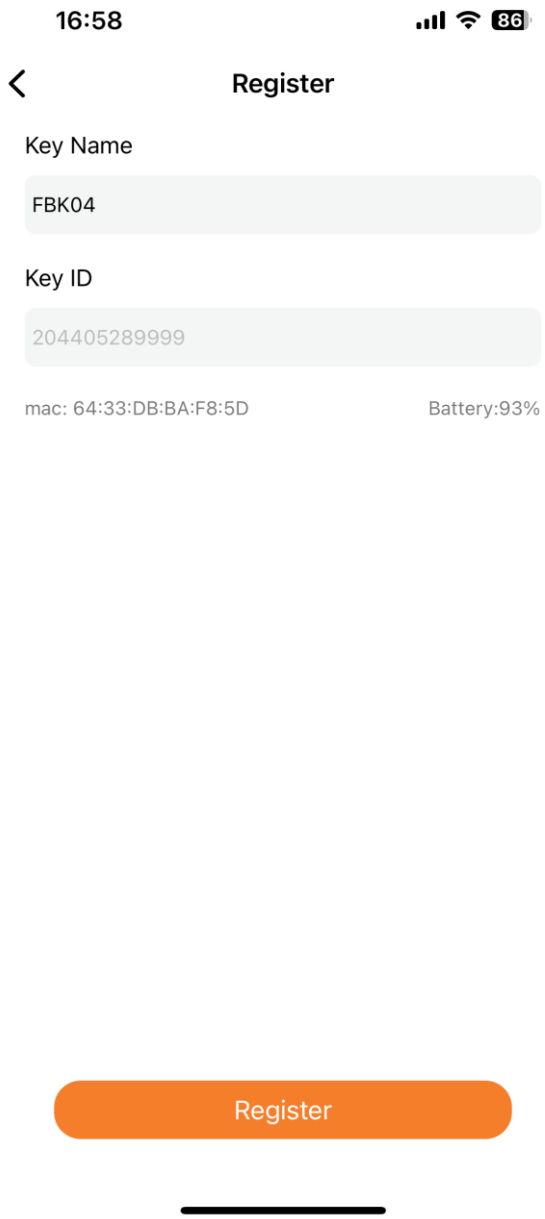
We can see the green light of key, and the info. in the APP, click in.

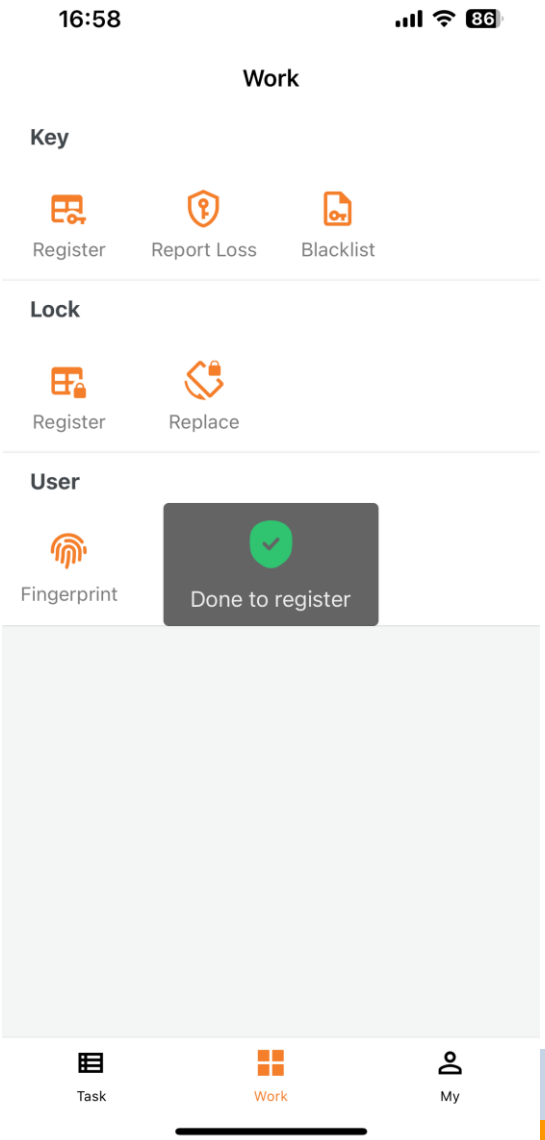
Then the app will read key info.



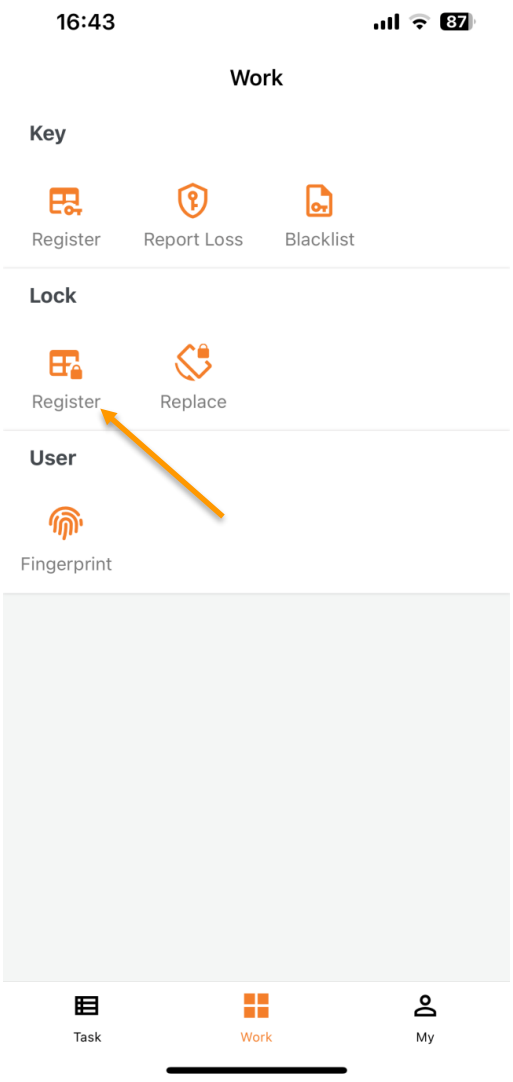


Input key name as we need, then click register.

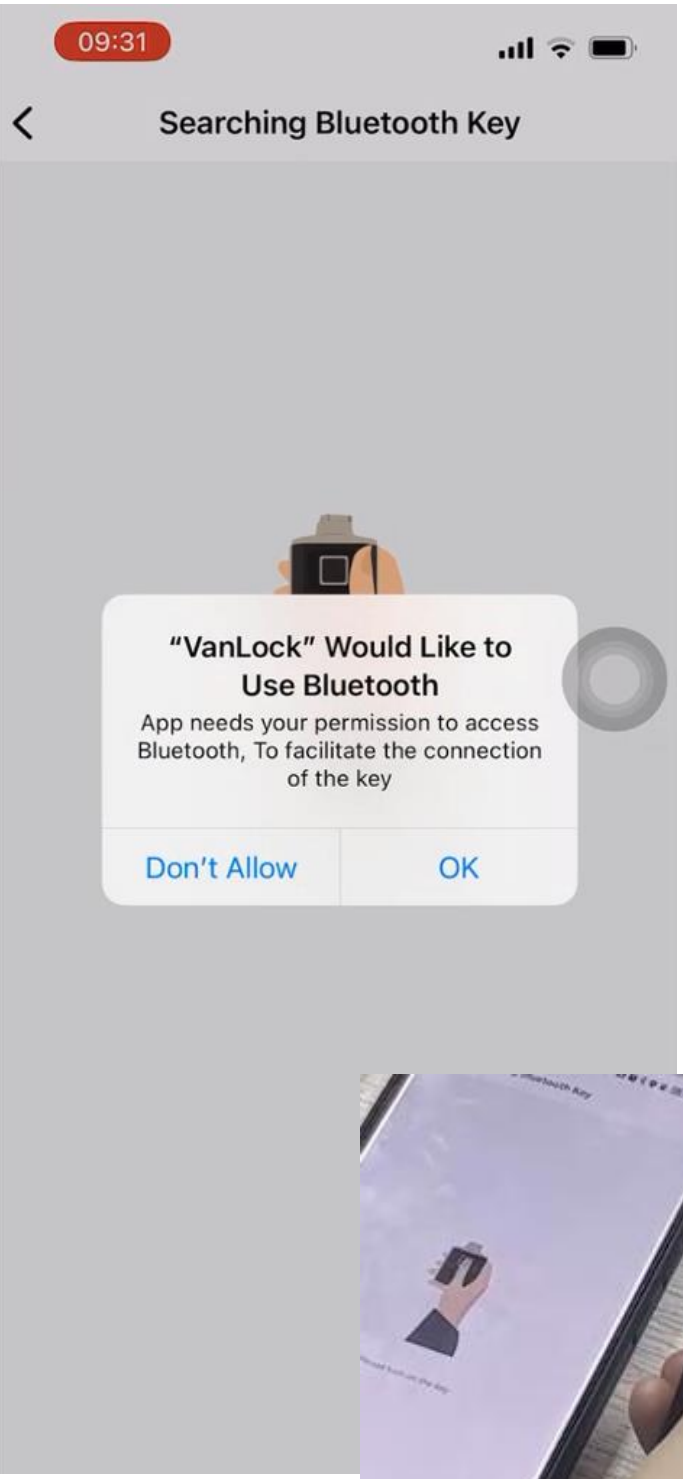




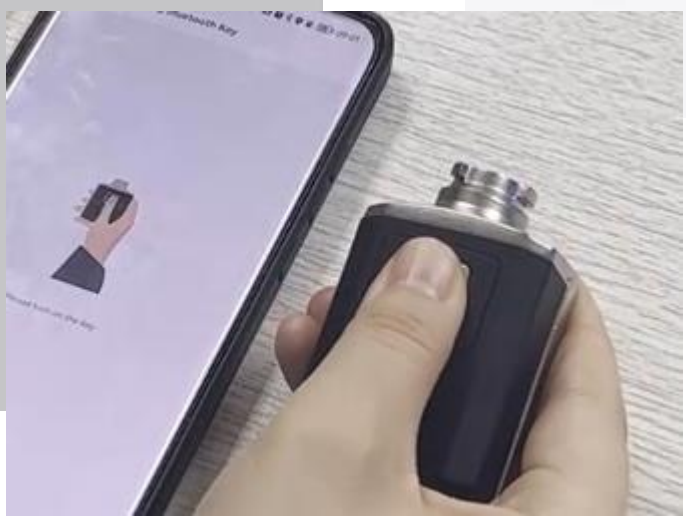
# 4. Register Lock

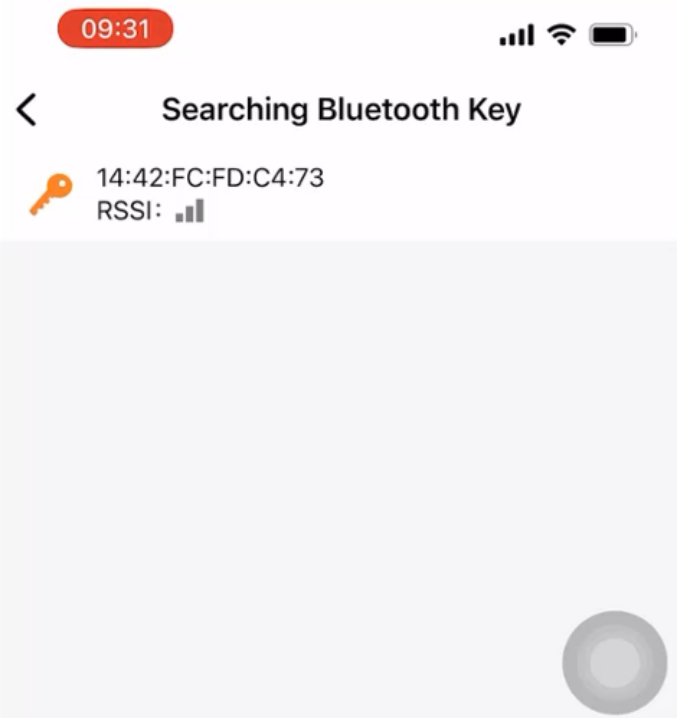


Click “Register” to add a Vanma lock.



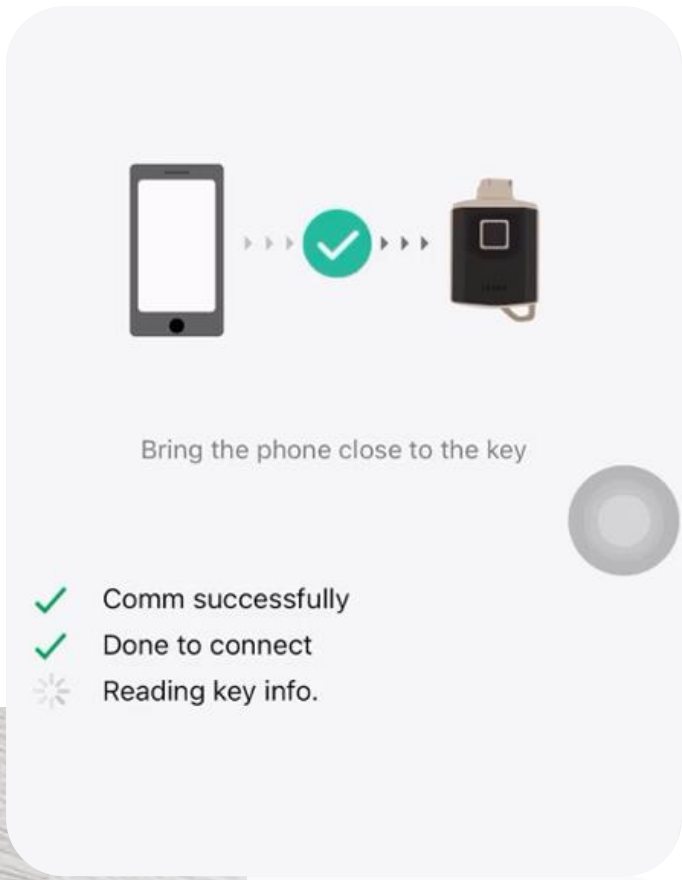
We need to long touch the fingerprint sensor to activate Bluetooth for connection.

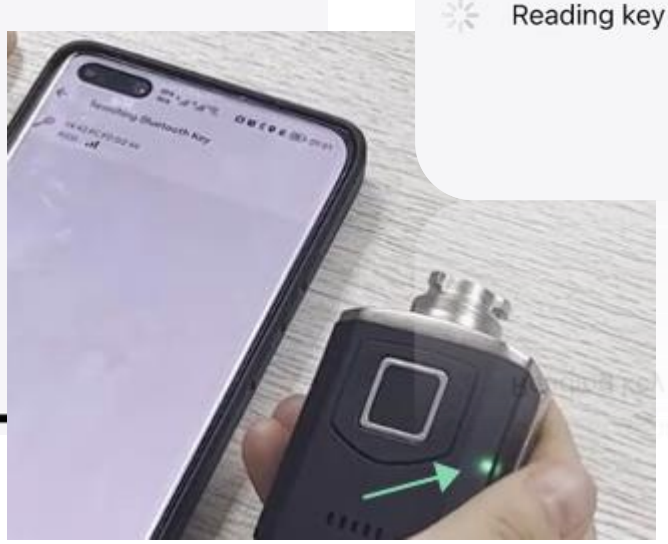


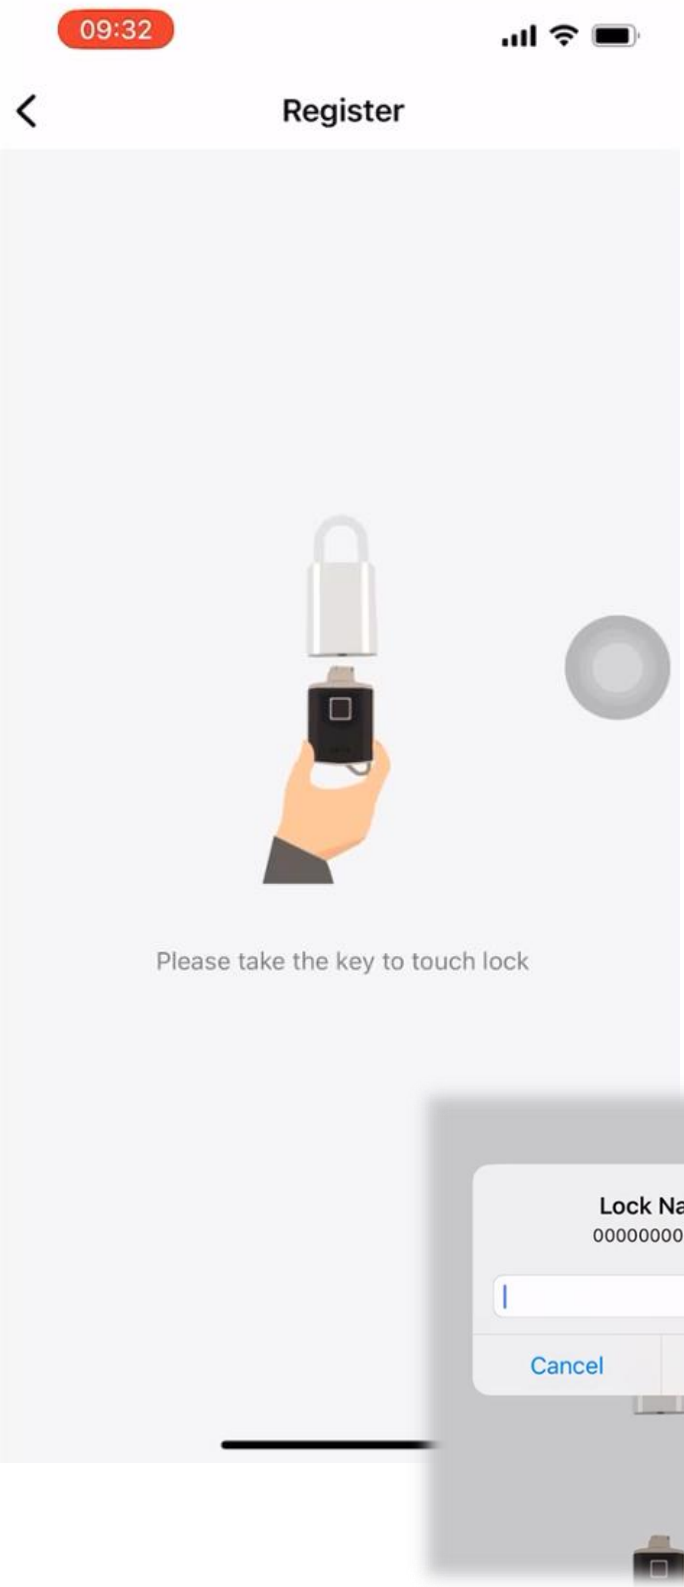


We can see the green light of key, and the info. in the APP, click in.

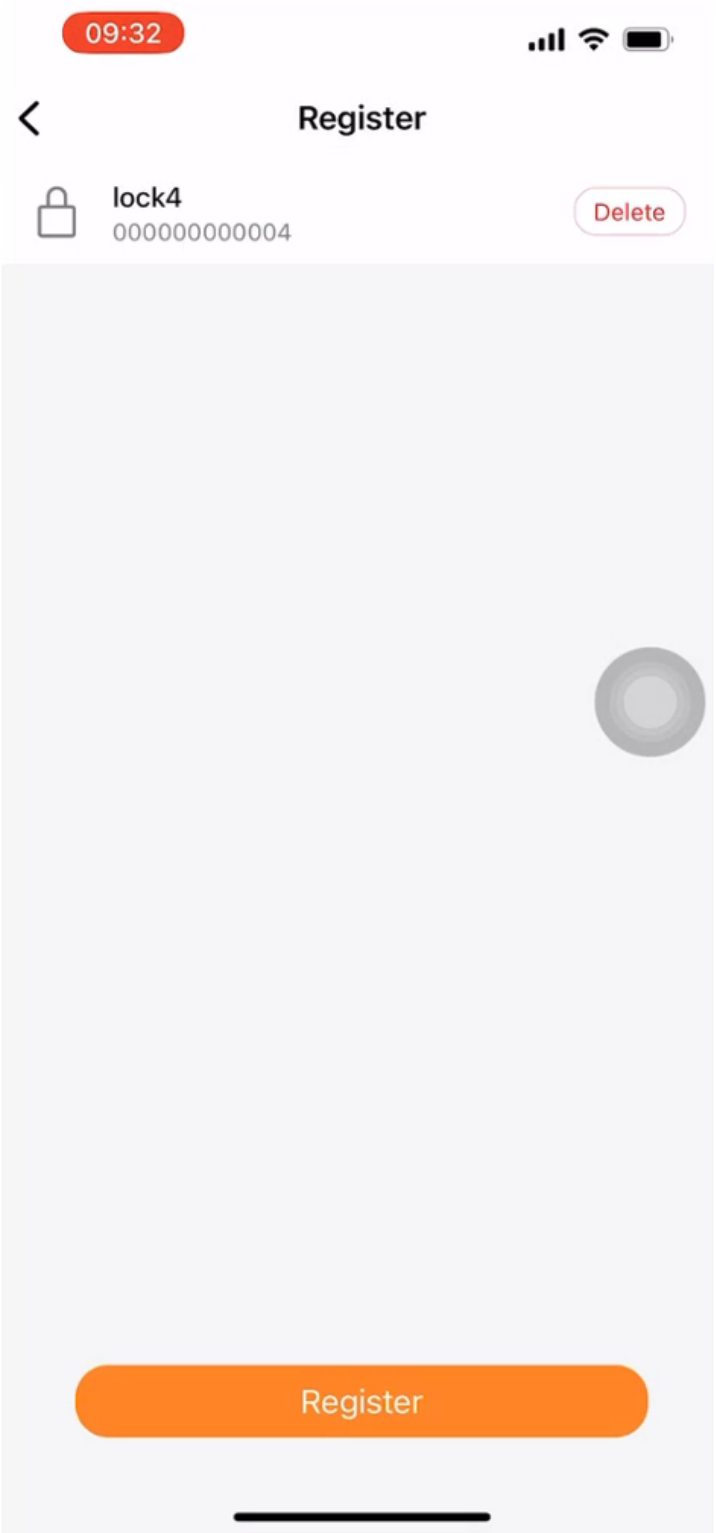
Then the app will read key info.



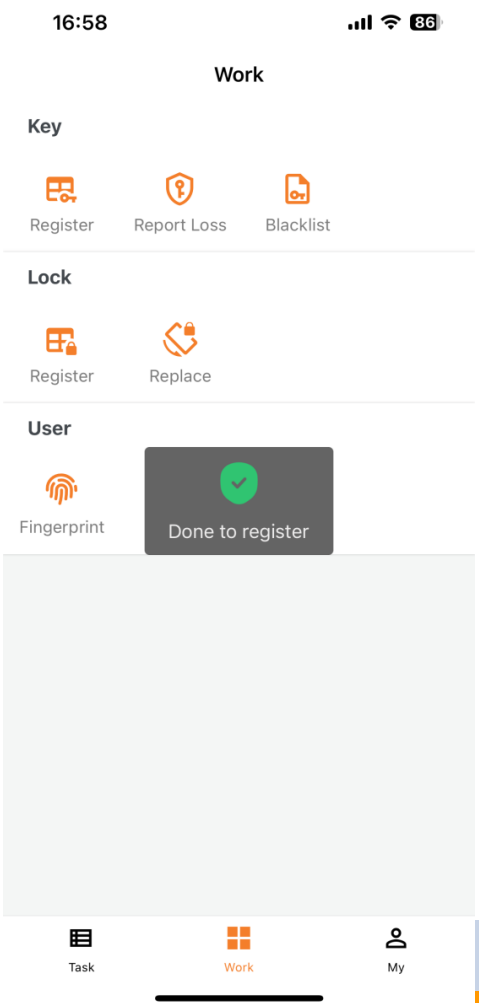




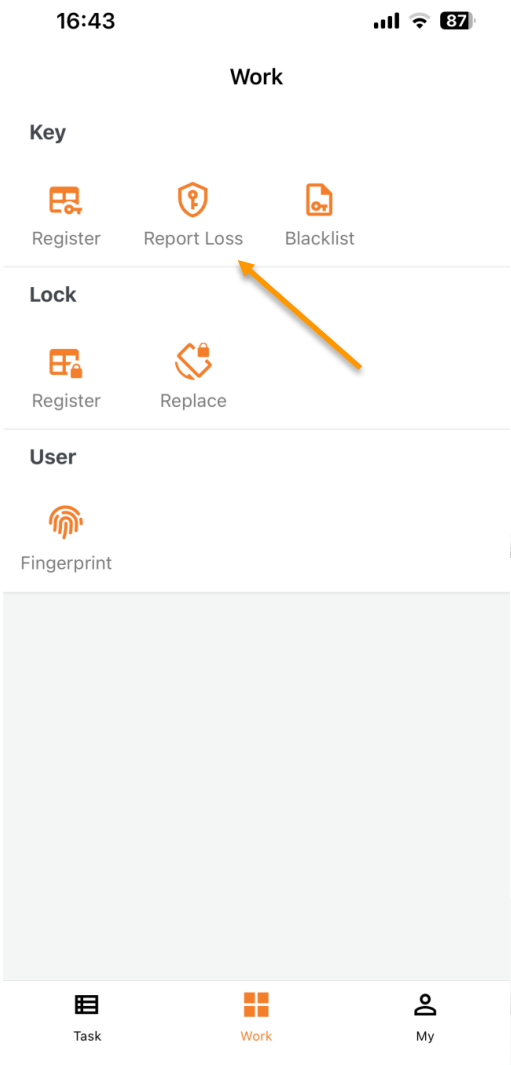
- This time we need to take key to touch lock, there will be a voice prompt (communication successfully) and blue light on.
- Input lock name as we need.



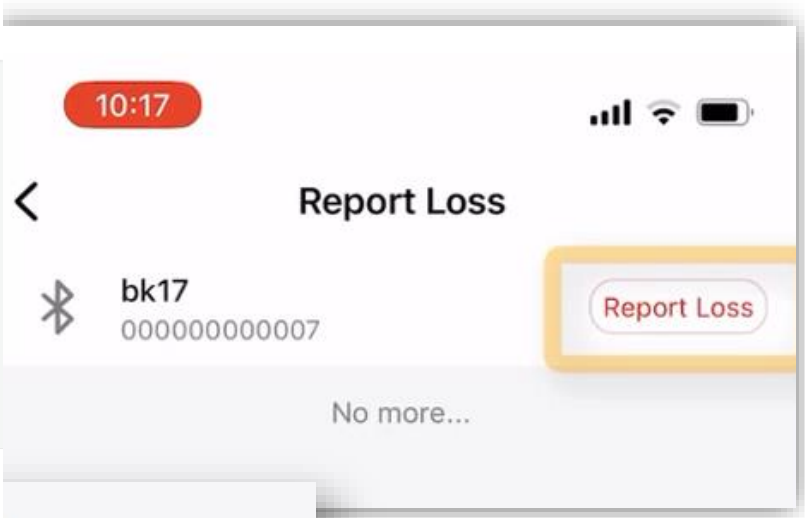
Then we could see the lock here, click register.

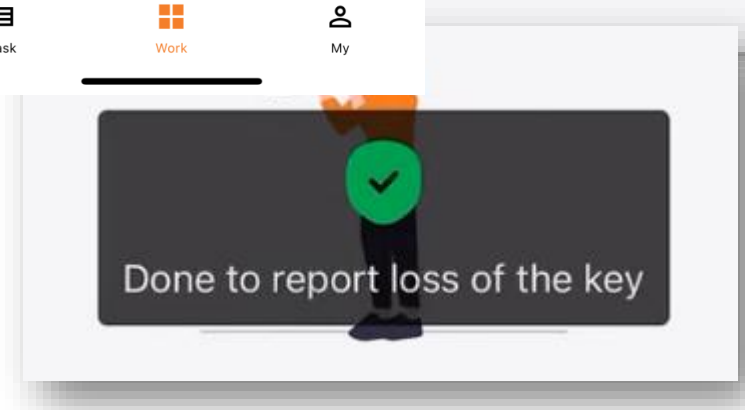


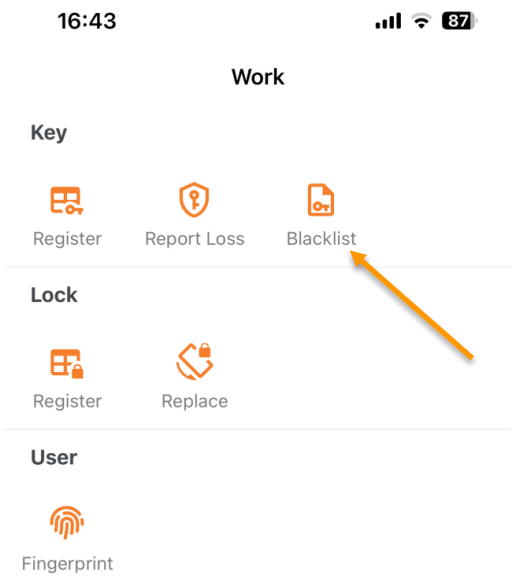
# 5. Set Blacklist



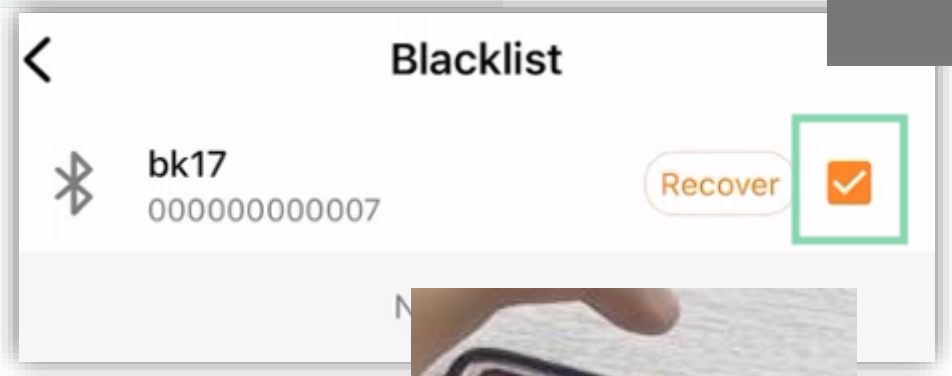
- It is an useful function when we lost any key.
- 1st step: report loss of the lost key in APP



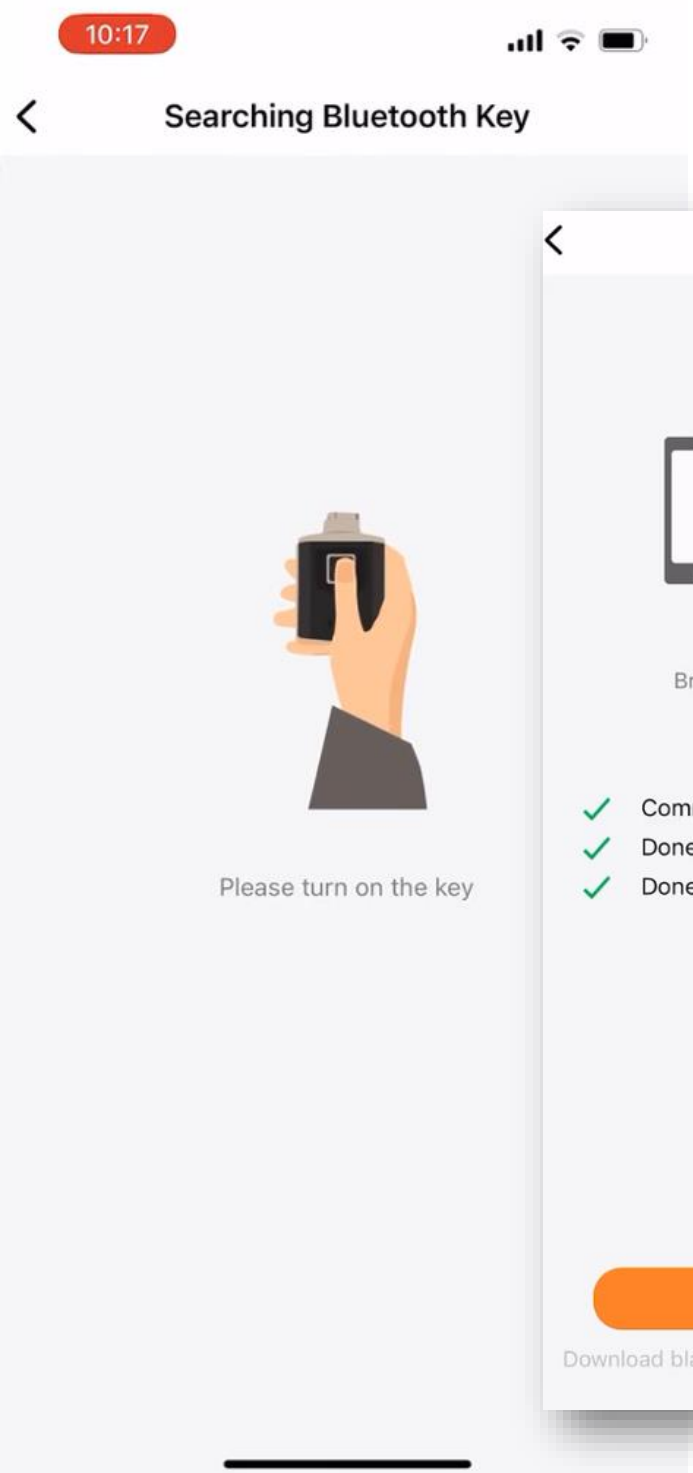


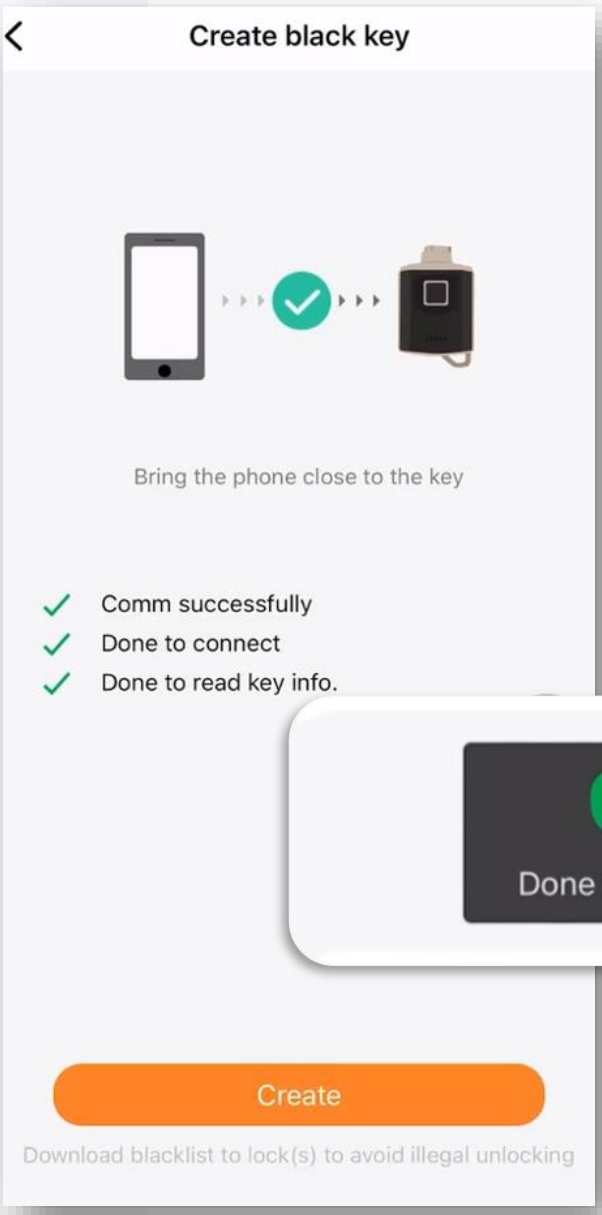


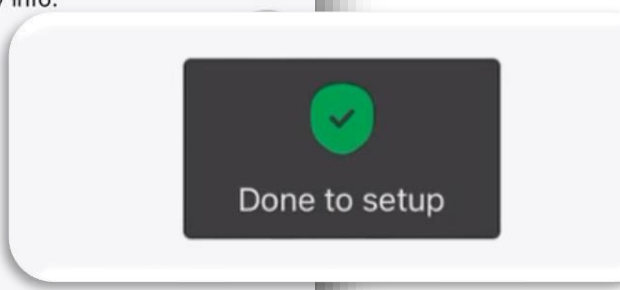
- 2nd step: click in Blacklist, choose the lost key and create a black key.
- Note: the black key should be a NEW key.
- Select the key and choose “Black key”



Activate the Bluetooth as usual, after app read key info, click create.

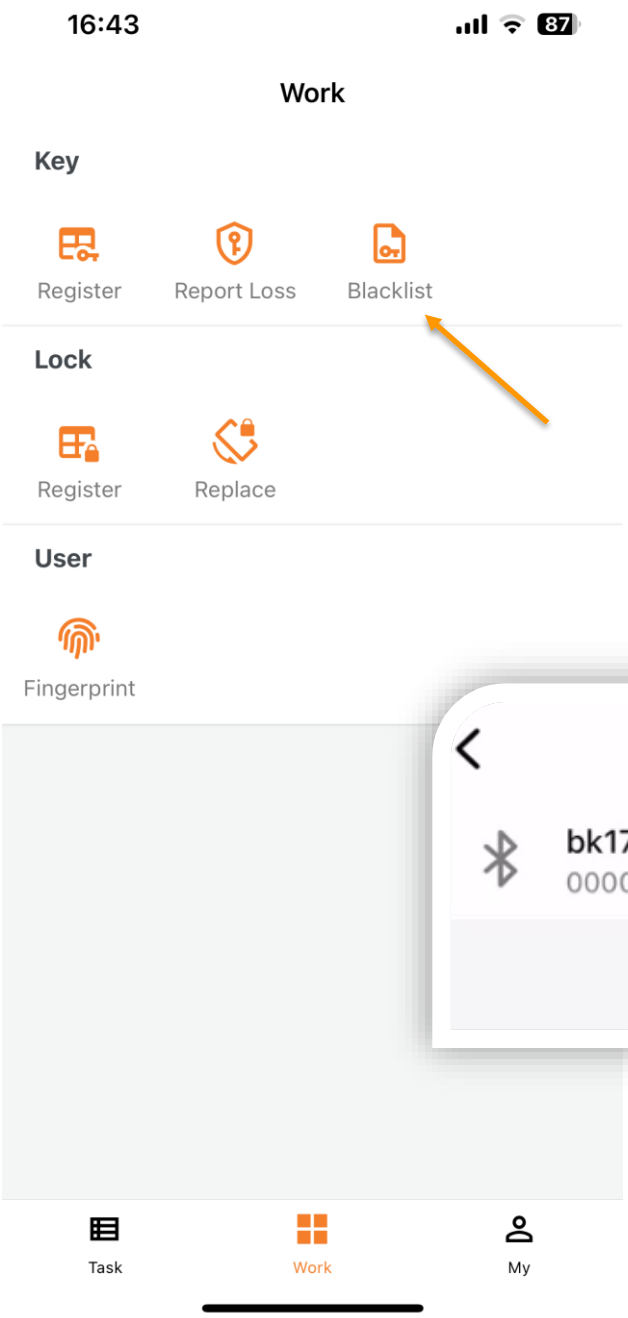




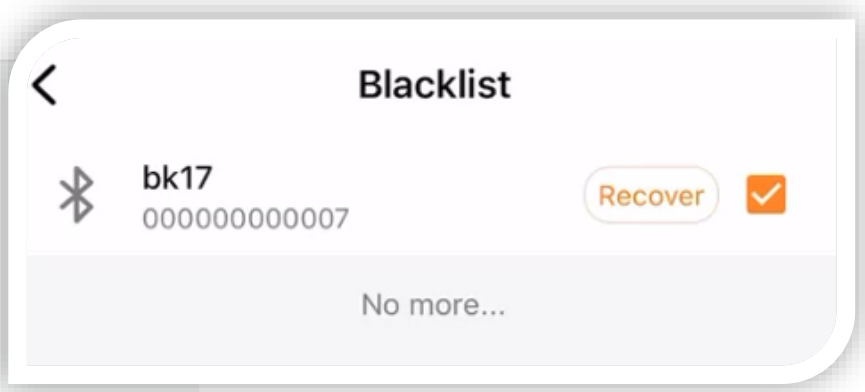


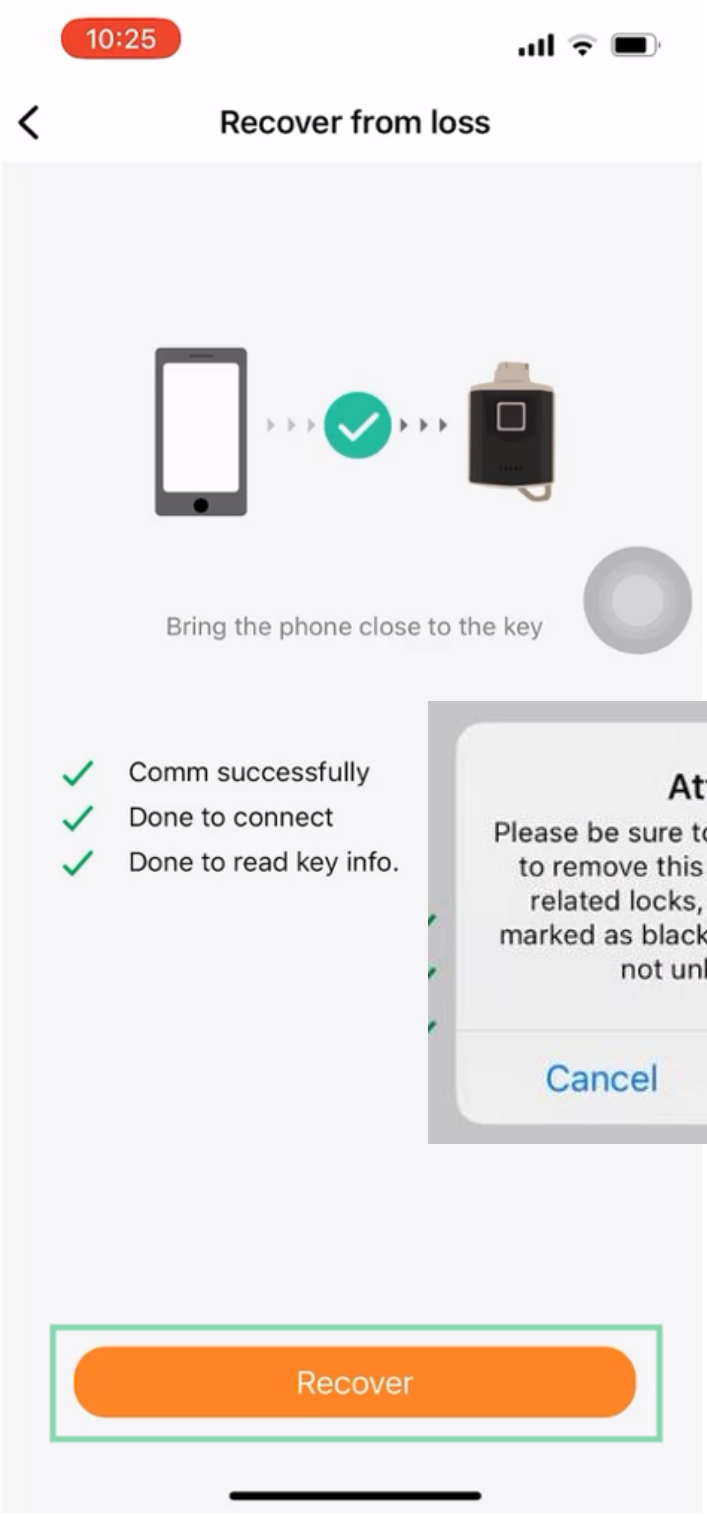
- Use the black key to touch the lock, the lock should be the one that can ever be unlocked by the lost key.
- There will be a voice prompt (communication successfully) and blue light on.

If we find the lost key, we can use APP to do the following steps to recover it:

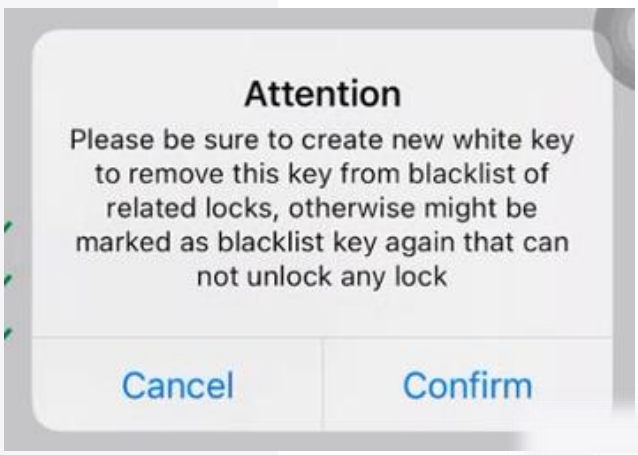


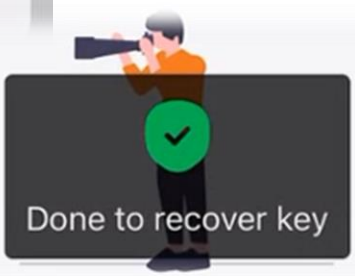
Click in “Blacklist”, select the lost key and click recover.

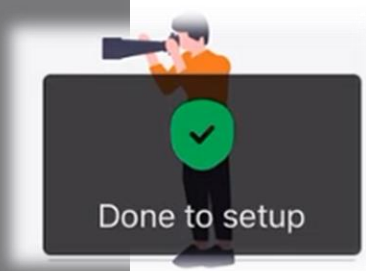


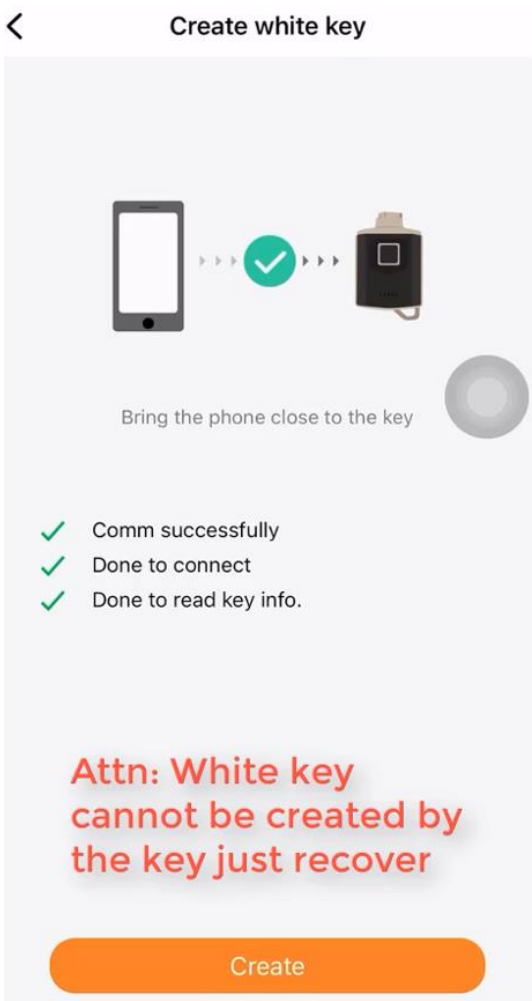


- Same as before, activate Bluetooth, wait APP to read key info, then click recover.
- Confirm it.





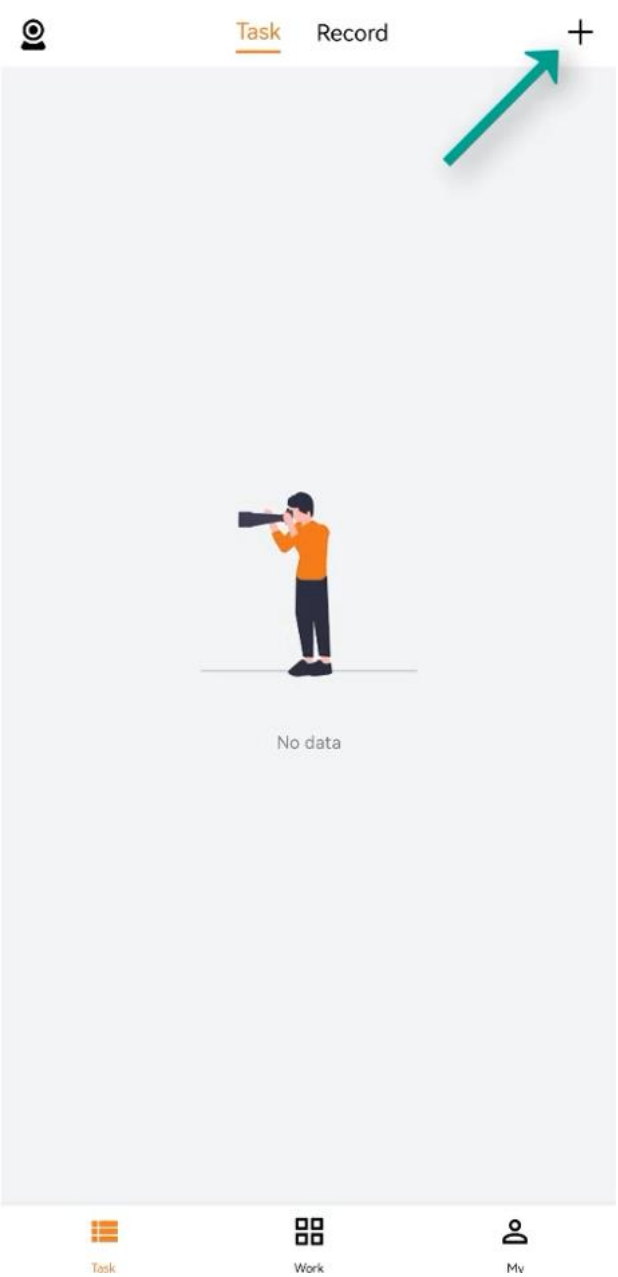




- We need to set another key as a white key to remove the blacklist mark in the lock.
- Click “White key”, note white key cannot be created by the key just recover, after read key info, click create.

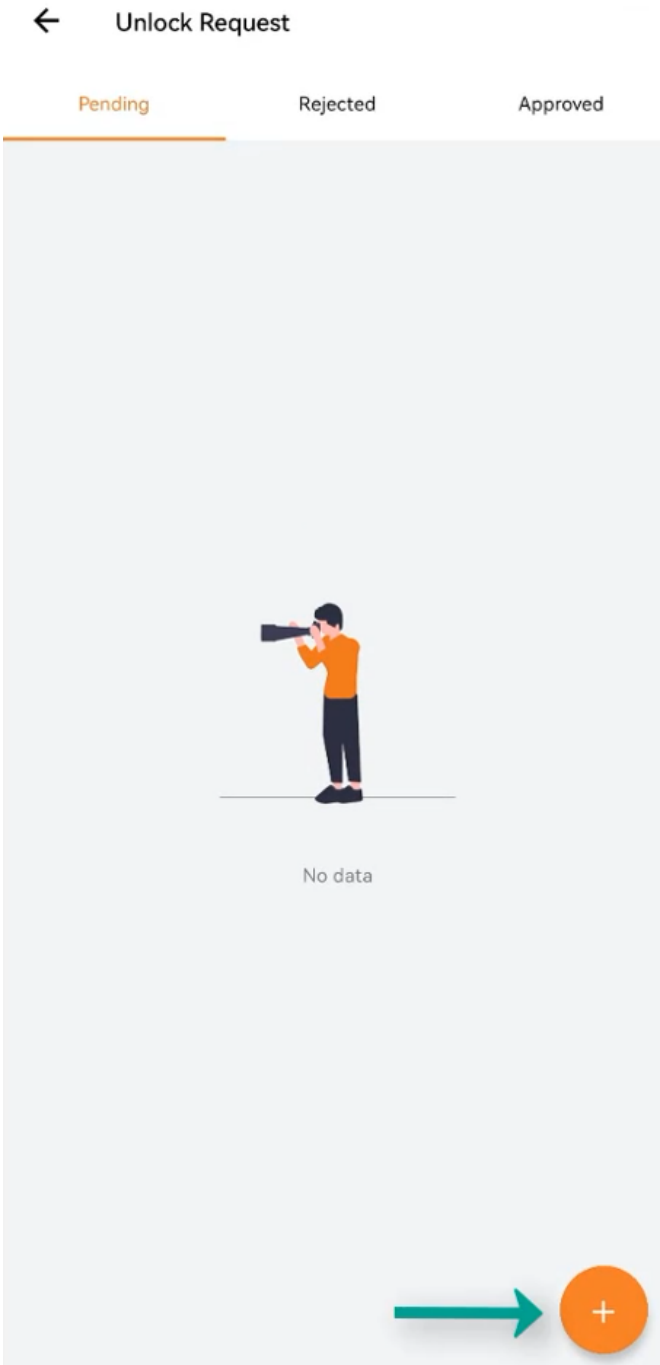
- Use the white key to touch the lock, the lock should be the one that can ever be set a black mark.
- There will be a voice prompt (communication successfully) and blue light on.

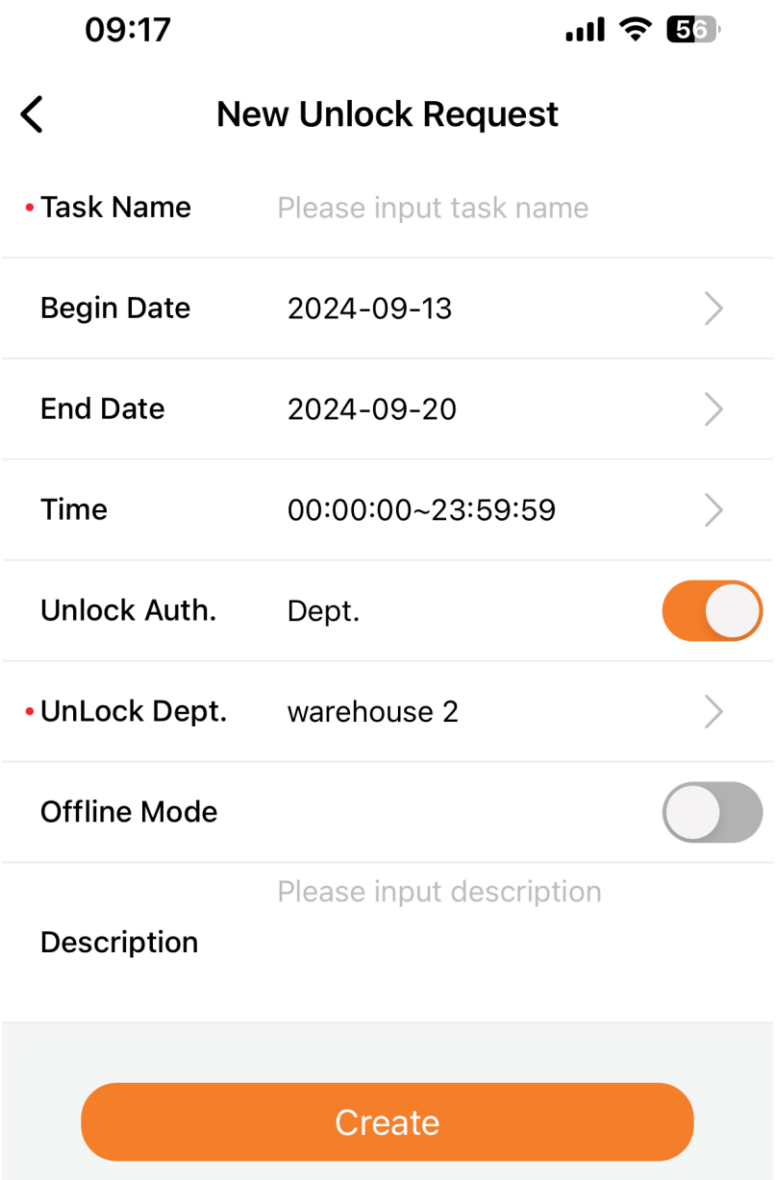
# 6. Temporary Plan



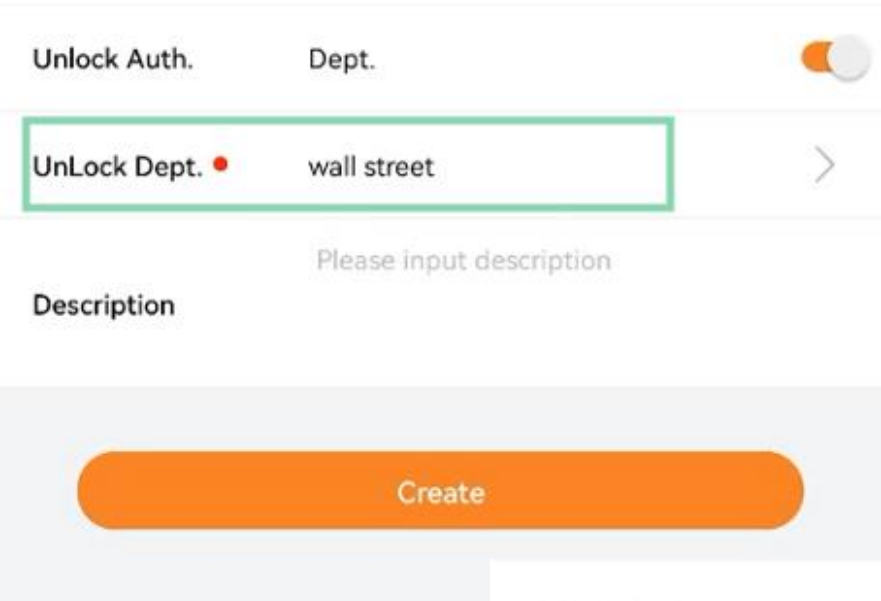
- Temporary plan is used when the staff need to unlock lock that not belongs to his task.
- Click “+”.

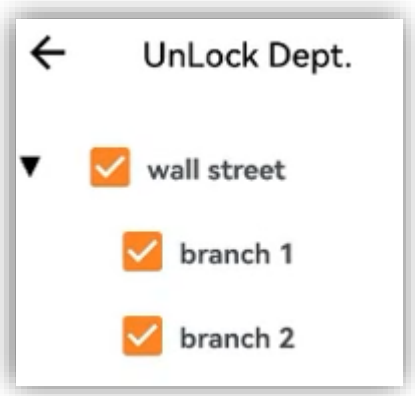
- Click next “+”, then same as before, activate Bluetooth, then we could see this unlock request.
- Input info as we need, then click create.

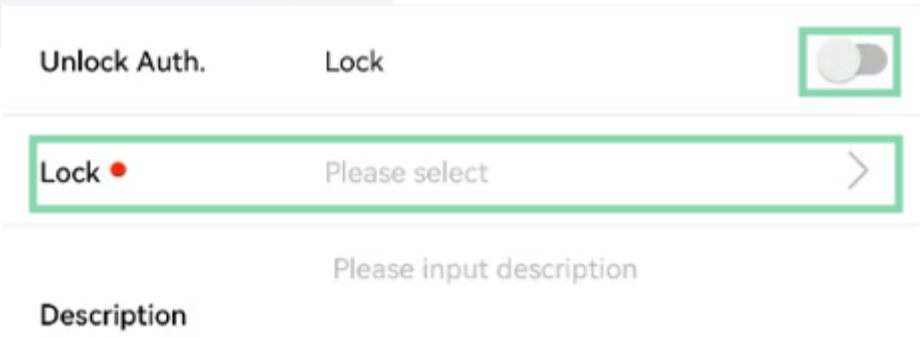


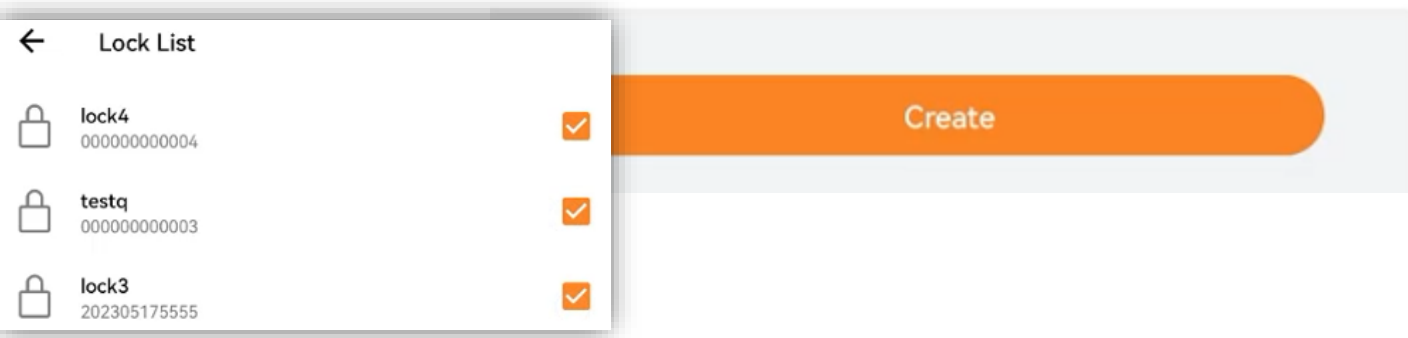


Vanma Lock

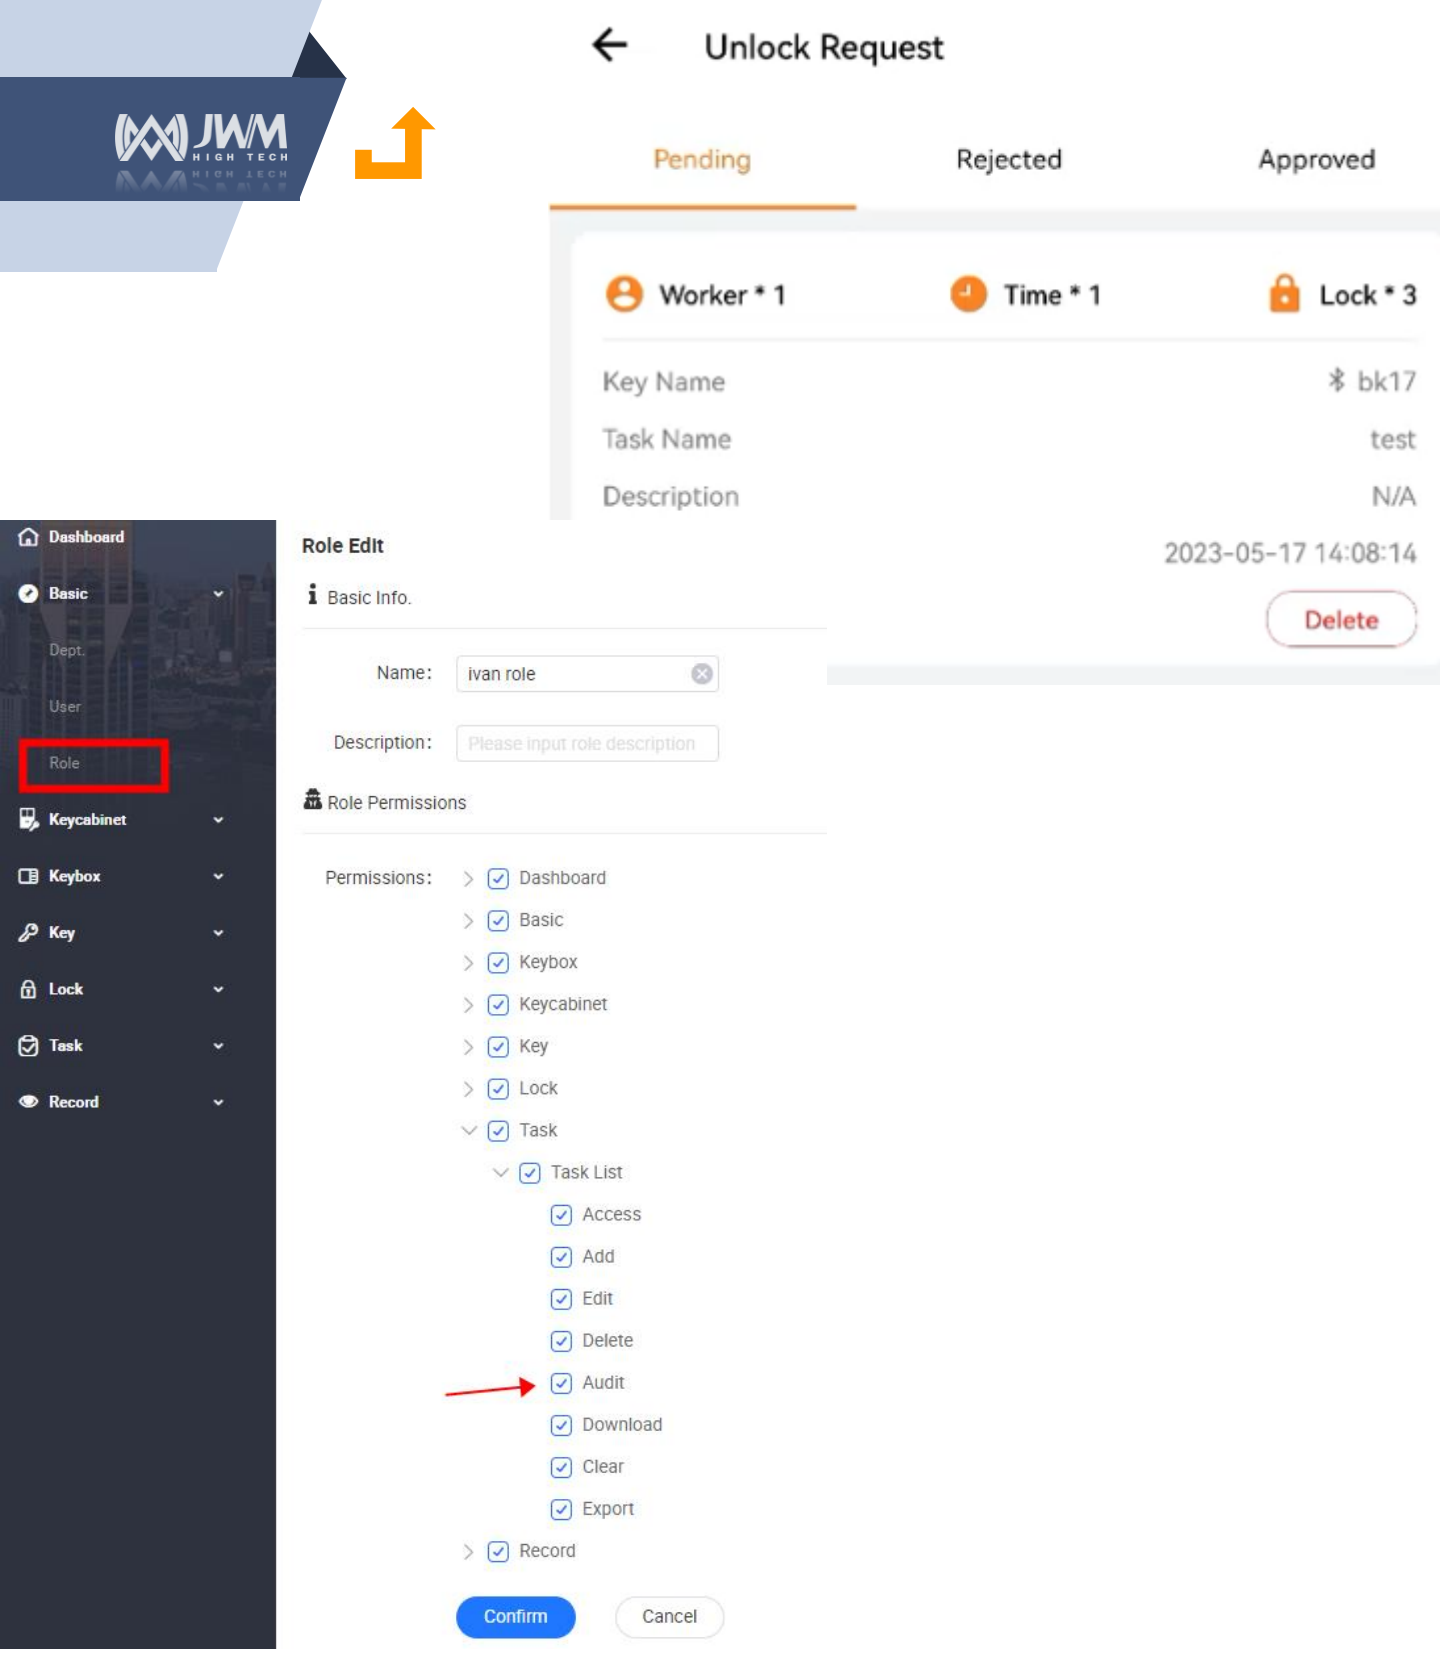






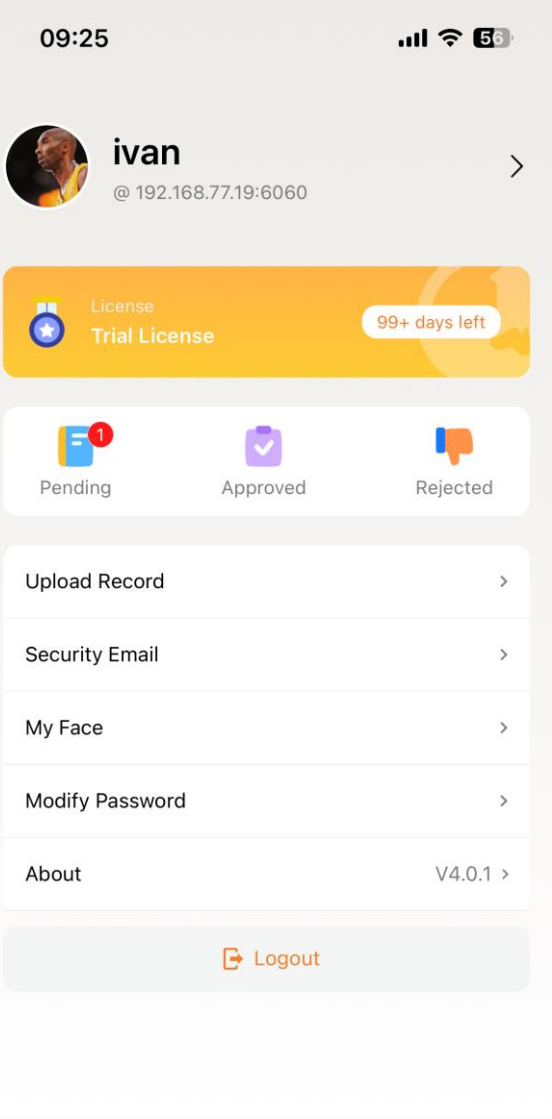


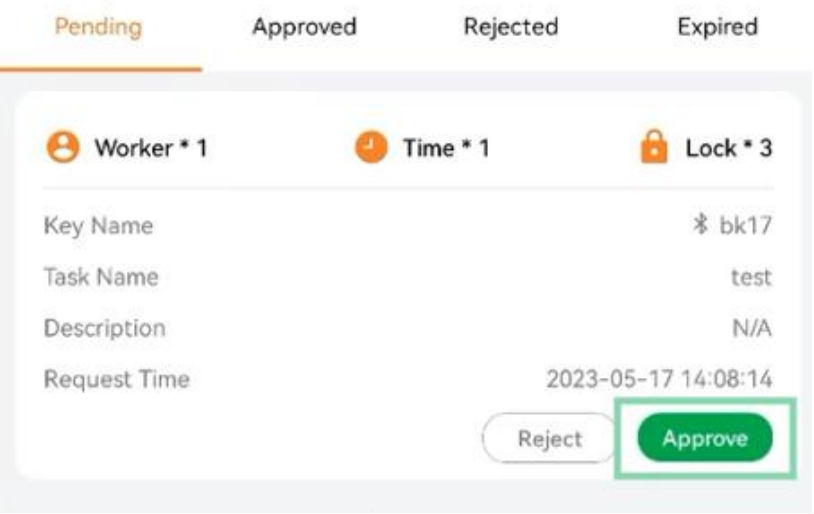
We could select unlock permission by department or by specific locks.

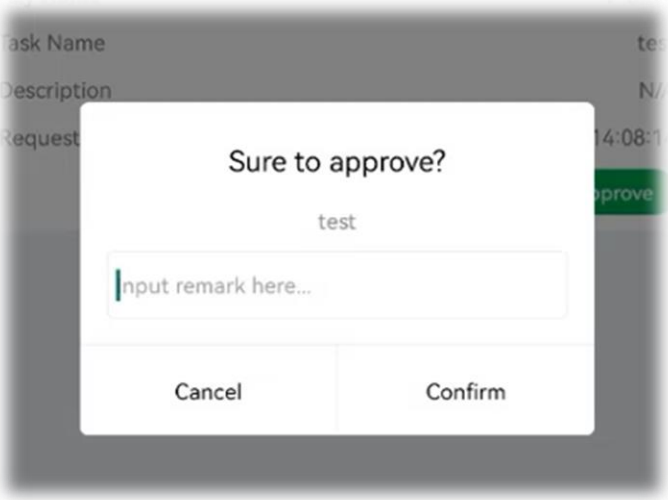


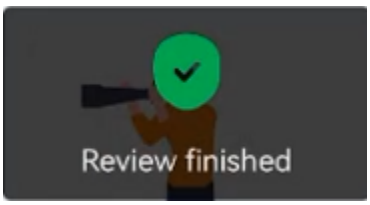
Then it will generate a request as we can see。

If we give worker the permission (software) to approval temporary request, we could do:





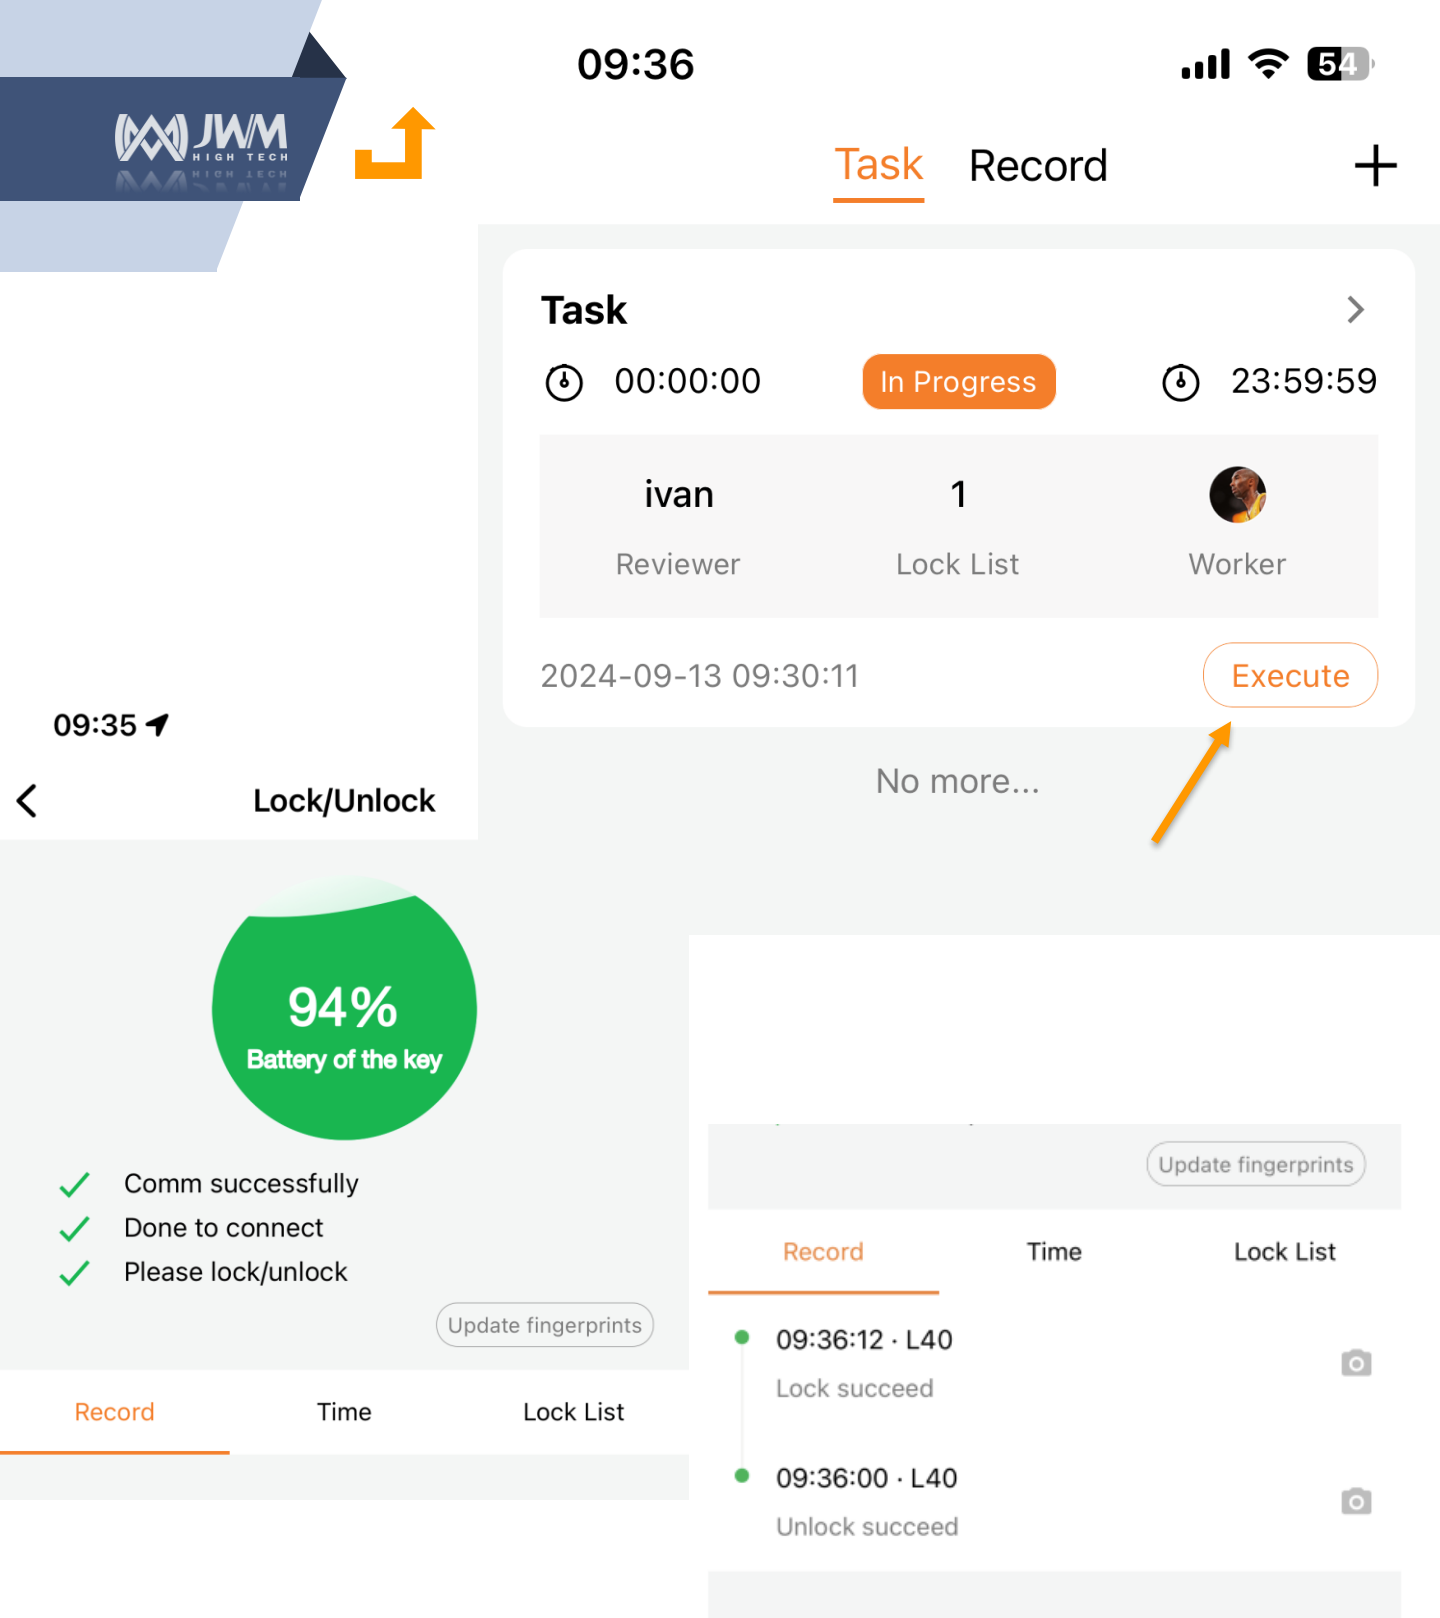




Click <My> and you can see a mark “1” in <Pending>

Here we could click Approve to give permission.

Vanma Lock



click “Execute” to unlock locks.

activate Bluetooth, verify fingerprint then we could operate the locks. If the worker’s fingerprint is changing, we need to press <updating fingerprints>

App support to take photo

Vanma Lock

📖Now the quick start guide manual is end.
